

Take the risk out of service interruption.

Critical power systems that keep you running.

 **CONCENTRIC**
Engineering Uptime.

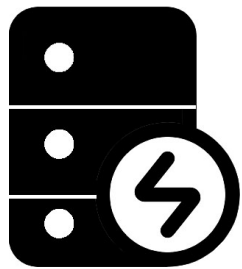

IT infrastructure and facility managers rely on Concentric to provide critical power systems that deliver uptime when the unexpected happens.

Clients and industries we serve:

- Telecom & cable
- Data centers
- Oil & gas
- Manufacturing
- Electrical utilities
- Healthcare
- Facility services
- Universities
- Government

**Take
out the
guess
work.**

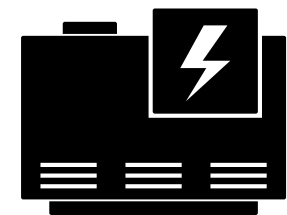

Uninterruptible Power Supply (UPS)

Single conversion (offline), double conversion (online), and line-interactive UPS solutions that deliver standby power to an array of critical applications.

DC Power Systems

Turnkey power supplies including the design, installation, commissioning, testing, data management and ongoing maintenance.

Generators

Emergency standby diesel and gas generator applications, and their integration with overarching UPS systems.

Critical power lifecycle management

Concentric manages your critical power systems from cradle to grave.

Managed Services:

- System design with drawings
- Power system installations
- AC - DC, AC - AC, DC - AC power options
- EPA certified recycling
- Telecom power plants + cabling & distribution
- IEEE battery preventative maintenance (PM) & testing
- Grounding upgrades
- Lithium thermal scanning
- Data center & industrial grade UPS & inverters

Superior critical power so you can focus on your core business.

Concentric's divisions support industrial, commercial and utility companies

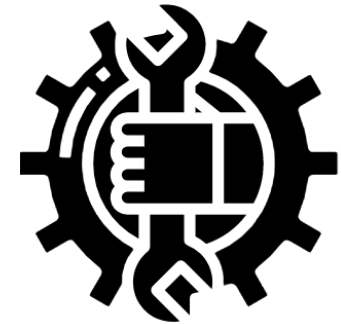

Motive Power

Engineering expertise in all facets of material handling fleet power and management. From system design, install and ongoing preventative maintenance, Concentric engineers uptime for both manufacturers and distributors alike.

Critical Power

Concentric helps diverse industries protect against unforeseen power outage events. Hospitals, telecom providers, oil & gas companies, manufacturers, banking and financial institutions use Concentric to ensure processes continue to run and protect vital operations.

Material Handling Maintenance

Concentric's on-site maintenance platform is delivered by skilled technicians who are brand independent in their repair capabilities and are driven by real-time data decisions that engineer uptime for Fortune 1000 organizations.

Concentric serves customers nationally with over 250 technicians across 30 plus states.
