About Concentric

Years ago, a group of power entrepreneurs re-imagined how forklift and critical power are bought and used by customers. That vision began with GuaranteedPOWER® in 2002.

In 2018, several of these teams joined together to form Concentric. And our mission is simple – to deliver superior engineered systems so you can get out of the power business and focus on your core.

Today, Concentric is made up of companies from across the nation that share our mission for customer-centric power systems.

We design, install and manage power and maintenance solutions across various industries including:

- Manufacturing
- Distribution / 3 PL
- Cold Storage
- High Heat Environments
- Food Processing
- Apparel
- Automotive
- Building Materials
- Telecom & Cable
- Data Centers
- Healthcare
- Electric Utilities

Our Services

FORKLIFT POWER

System design and management expertise in all facets of material handling fleet power. From system design, install and ongoing preventative maintenance, Concentric engineers uptime for both manufacturers and distributors alike.

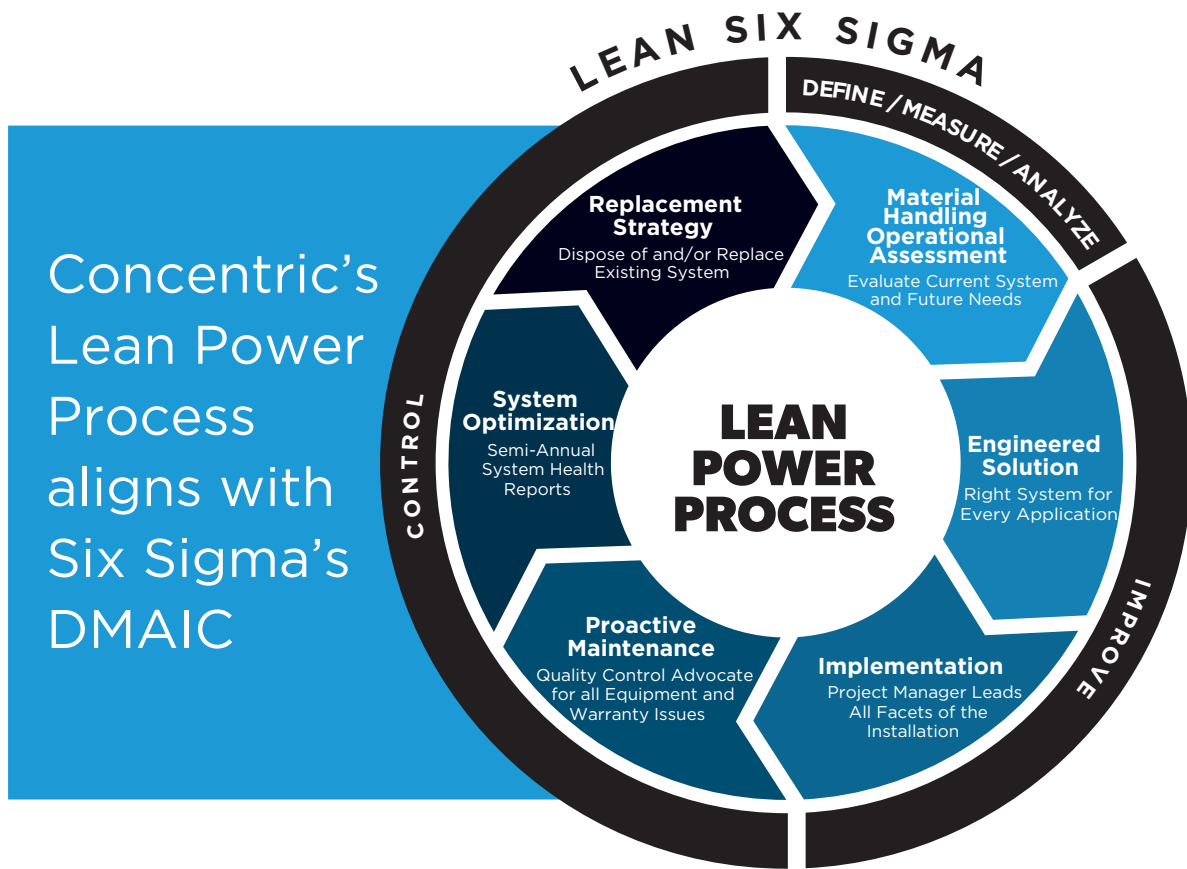

CRITICAL POWER

Concentric helps diverse industries gain peace of mind against unforeseen power outages. Data centers, telecom, oil & gas companies, hospitals, manufacturers and financial institutions use Concentric to ensure vital operations continue to run.

How we work

Concentric takes a data-driven, continuous improvement approach to engineering power and maintenance solutions for material handling equipment.

POWER THAT BOOSTS YOUR BOTTOM LINE

Our engineered systems take risk, waste and cost out of your systems, delivering an average 30% savings to a Top 5 expense in high velocity manufacturers and distributors.

PROGRAMS THAT GET YOU OUT OF THE POWER BUSINESS

Concentric oversight means less repairs, longer asset life and no more downtime, which allows you to focus on your core business and the priorities that matter now.

ENGINEERING SYSTEMS THAT ARE RIGHT FOR YOUR APPLICATIONS

We take an application-engineering, technology-independent approach. We assess your operations then design hybrid power systems that may include lead acid, thin plate pure lead, lithium or hydrogen fuel cells.

THE ONLY NATIONAL TECHNICIAN WORKFORCE IN THE POWER AND MAINTENANCE INDUSTRY

Our technicians and engineering team know a thing or two about power — along with the first-hand experience and data-driven service actions to back it up.

FORKLIFT & AGV POWER MAINTENANCE SERVICES

- Cable Repair & Replacement
- Battery Washing
- Watering System Repair
- Acid Adjustments
- Battery Recycling
- Capacity Testing
- Battery Reconditioning
- Safety Evaluations
- Remote Monitoring
- Planned Maintenance

CRITICAL POWER & MAINTENANCE SERVICES

- System Design & Drawings
- Power System Installations
- AC – DC, AC – AC, DC – AC Power
- EPA Certified Recycling Program
- Telecom Power + Cabling & Distribution
- IEEE Battery PM & Testing
- Data Center & Industrial Grade UPS
- Lithium Thermal Scanning
- Grounding Upgrades
- Site Assessments
