## EMERGENCY POWER GENERATION

### About Us

Concentric's Critical Facility Services offer a total integration of products, services, and management, eliminating the inconvenience of dealing with multiple vendors and subcontractors.

ABT succeeds at delivering a lower cost of ownership and high return on investment for our clients.

### Emergency Power Generation

Concentric manages critical power and support systems by providing a reliable line of products and services, reducing costs and exceeding expectations. Our Emergency Power Generation Services include:

- Comprehensive maintenance on Diesel or NG/LP engines
- Custom maintenance programs per client's requirements
- Vendor supervision and owner representation
- Disaster recovery readiness/assessment programs
- Annual load bank testing to ensure readiness

### Infrared Scanning

- Find the exact source of a potential problem before it causes costly equipment failure
- Proactive, preventative, maintenance on any electrical or HVAC equipment

### Utility and Emergency Switchgear

- Engineer, Furnish and Installation (EF&I)
- Extensive nationwide network of product specialists at your disposal
- Preventative maintenance with monthly or quarterly systems testing
- Automatic Transfer Switch (ATS) testing and calibration
- 7x24x365 emergency response

### Diesel Fuel System Management

Concentric is at the forefront of the diesel fuel management field. We develop proprietary equipment and services to provide clients with the most reliable stored diesel fuel possible. Our services include:

- Annual management and testing programs
- Certified independent lab analysis
- Remediation and chemical stabilization
- Self-contained equipment - deployable to any location
- Water detection and in-tank elimination
- Client-specific, complete management programs
- Reconditioning and filtration

- Clear, concise and accurate reports include repair recommendations/remediation
- Mission critical equipment can be taken off-line under scheduled shut down avoiding costly downtime

Analyzing your most critical needs always starts with a site assessment. Contact us to schedule one today.
