# ENGINEERED POWER SYSTEMS.

## **NEVER STOP.**

THE RIGHT TECHNOLOGY FOR EVERY APPLICATION.

## YOUR ONE STOP SHOP FOR ALL YOUR TECHNOLOGY.

No one else in the industry can engineer, guarantee and manage power systems that incorporate every viable technology offering.

## **OUR SERVICES INCLUDE:**

Assess Current Power Requirements On-site assessments drive system design

**Design Your Power System** Requirements dictate technology selections

Implement Your Power System Change management with no downtime

Manage Your Power System A service team that ensures the technology delivers

Contact us today to learn more about how an Engineered Power System might benefit your facility.

## OPTIMAL POWER DESIGNED FOR YOUR FLEET.

#### LEAD ACID BATTERIES

- 99.7% recyclable
- Historical, proven power performance
- Opportunity, fast charge and battery swap options

#### TPPL

- Thrives when daily charge time is available
- Good for lighter use applications
- Less charge time required

We match the right technology to every application in your facility.

#### LITHIUM

- Equipment life equals forklift life
- Less charge time required
- Higher-use power
  applications

#### HYDROGEN POWER CELLS

- Runs on 3 min fills
- Eliminates charger space needs in the facility
- Good option for greenfield sites

## TAKE THE RISK OUT OF NEW TECHNOLOGY

We have a technology independent engineering team working for you.

## Selected technologies meet our highest engineering standards in:

Safety • Data Transparency	• Flexibility • Performance
Lowest Cost of Ownership	Environmental Impact
Supplier Credibility •	Nationwide Support

ALWAYS ON. ALWAYS READY TO WORK.
