SMART SERVICES SOLUTIONS

The smart services solutions from **compacer** bring together top-class technology to create complete digital special concepts for various different business segments and sectors. All the solutions are united by the concepts of ideal process automation and target-oriented data processing.

EDI - ELECTRONIC DATA INTERCHANGE

Whether it's within your own enterprise or in business relations with customers, suppliers and service providers: in our globalised world it is the secure, reliable and rapid transfer and exchange of information, documentation and data that decides on the success of an enterprise.

Put your trust in Electronic Data Interchange (**EDI**) to improve the quality and information of data and the security of business processes, achieving high-speed transmission and thus reducing costs.

All from one hand: for the holistic management of electronic data – internal and external interchange, the integration of business processes, all the way up to real-time visualisation – we're there to help you as consultants, system-independent service providers and operators.

Reliable, automated interchange of data anddocuments via our B2B **EDI** network.

Improved procurement processes thanks to qualification and test portals for your **EDI** partners.

Reduction of process costs thanks to smooth and fast connection to partners and suppliers.

Secure services in **eurodata's** own high-performance data centre in accordance with **ISO/IEC 27001**. As a member of the eurodata group, we use this.

A high degree of transparency along the whole of the supply chain and **efficient measurement and management of data interchange processes**.

Just **rely** on our vast experience: for over 20 years, customers have been partnering with **compacer** to protect their highly sensitive data.

AREAS OF APPLICATION

Our service modules are solutions for the automated exchange, integration and management of electronic data. We see ourselves as your expert for routine operation and special cases, and support you in the development of your **EDI** business.

APPLICATION MODELS

MANAGED SERVICES:

services provided through our e-business platform. As we belong to the eurodata group, we are benefiting from eurodata's own ISO/IEC 27001-certified, high-performance data centre at Saarbrücken (Germany).

SOFTWARE-AS-A-SERVICE (SAAS):

Secure cloud services at eurodata's own ISO/IEC 27001-certified, high-performance data centre at Saarbrücken (Germany). As part of the eurodata group, we fully trust in our sister company's data security.

ON-PREMISE:

Implementation based on the technical infrastructures of our customers or of their hosting providers.

?

Are you familiar with **compacer edbic**? **edbic** is a modern data integration system which connects all those involved along the value added chain (digitalisation). All the business data with their various diff erent formats and origins come together in **edbic** and the business processes are improved in the long term by automation of the kind that makes sense. **edbic** supports the visualisation of those business processes (e.g. with **edpem**, **arcplan**, **cognos**) and ensures clarity (technical monitoring and process overview) and stability (active cluster architecture), for example in internal sequences (A2A) or data interchange with business partners (B2B). Info at **compacer.com/en/edbic**
