

NC4 to Focus on Cyber Security Solutions via New Company

NC4 announces formation of Celerium to bring innovative cyber defense solutions to market

EL SEGUNDO, CA – May 1, 2019 – NC4®, a leader in revolutionizing safety and security solutions, announced today the formation of Celerium, which will focus on cyber security solutions. These cyber security solutions are already in use by information-sharing organizations involved in finance, healthcare, retail, automotive, aviation, and defense.

“Our cyber defense solutions are changing the way we think about cyber security,” says Aubrey Chernick, founder of Celerium. “We are working with communities to build cyber defense and community awareness into day-to-day operations while accelerating the time from awareness to defense.”

In addition to information-sharing organizations, the cyber solutions are also in use by international entities in Canada, Asia, and across Europe. Celerium will also support ongoing projects for the United States Department of Energy, Department of Defense, and the Department of Health and Human Services.

“Our solutions support human collaboration, automated sharing of cyber threat information and community defense. Our latest innovation, Celerium’s Cyber Defense Network, is focused on improving community awareness and action through a number of new and innovative capabilities ranging from specialized community dashboards to automated bots,” says Karl Kotalik, President and CEO of NC4.

Celerium will showcase new advancements at the upcoming AFCEA TechNet Cyber event in May and the FIRST conference in June.

About NC4

NC4 delivers revolutionary safety and security solutions that empower businesses, government organizations, and communities to collect and disseminate intelligence to mitigate risks and manage incidents.

NC4 solutions are used by private sector companies involved in financial services, high-tech, insurance, retail, manufacturing, aerospace and defense, oil and gas, pharmaceuticals and healthcare, and other industries. In the public sector, NC4 solutions are used by federal, state, and local agencies for homeland security, emergency management and law enforcement.

About Celerium

Celerium protects important industry sectors and their members by augmenting and leveraging cyber threat intelligence to more actively defend against cyber threats and attacks.

Celerium's flagship solution, Cyber Defense Network, is a unique community collaboration experience combining communities, processes, and underlying technology to accelerate defensive actions for its members. Members are empowered to create, share, and receive threat information easily and rapidly, assess and prioritize relevant responses to cyber threats, and feed high-quality threat intelligence directly into key security technologies, significantly enhancing their value and member responsiveness.

Celerium powers the next generation of information-sharing organizations, including ISAOs and ISACs. Relied on by government agencies, enterprise risk management teams, CISOs, and SOC analysts, Celerium supports all critical infrastructure and market sectors. Learn more at www.celerium.com.
