### May/June

May saw near average precipitation and was the 8<sup>th</sup> warmest May on record. 1.86 inches of rain fell in May, which is 0.26 inches below the monthly average of 2.12. No snowfall was recorded. The average temperature for the month was 61.4 degrees, 4.3 degrees above normal. Four days reached or exceeded temperatures of 90 degrees or more, a new record for the month.

June witnessed below average rainfall and warmer than average temperatures. The month's average temperature was 72.4 degrees, 5.0 degrees above normal, with sixteen days reaching or exceeding 90 degrees, making June 2018 the 7<sup>th</sup> warmest June on record. 105 degrees was recorded on June 28<sup>th</sup>, which tied Denver metro's all time highest temperature.

Precipitation for June was just 0.43 inches, 1.55 inches below the average of 1.98 inches. 0.25 inches of that total fell on June 17<sup>th</sup>.

---

### West Nile Virus

No cases of human West Nile Virus were reported in in June in Colorado.

---

### Larval Control

Larval inspections started in May and commenced in June with a total of 159 site inspections for a total of 7.9 acres treated.

### **Wear Your Repellent!**

- Studies have shown that most human cases of WNV were preventable. Most people infected did not take precautions such as wearing long sleeves and using repellents.
- The most effective repellents contain 10%-35% DEET (N,N-diethyl-meta-toluamide).
  - DEET in high concentrations, above 50%, provides no additional protection.

---

## Adult Control Operations/Surveillance

A total of 0.0 miles of adulticide applications took place in June. Surveillance traps collected a total 902 mosquitoes in June with 33% of the *Aedes* species and 65% of the *Culex* species.
