

DOMAIN MIGRATION

Move to `companyname.workplace.com`

As Workplace is not Facebook, Workplace by Facebook's customers are requesting a clearer differentiator between Workplace and Facebook to avoid confusion.

This move to `workplace.com` will be optional for customers for the first six months, after which Workplace by Facebook will begin requiring customers to move over to the new domain. Are you ready for this migration? Want to get a jumpstart on moving your company over to the new platform before it becomes mandatory?

We can help your move from `companyname.facebook.com` to `companyname.workplace.com` be a seamless experience that is virtually unnoticeable by your community. Let's work together!

DELIVERABLES & ACTIVITIES

We will help you with configuring your back-end, updating your mobile apps, to planning for the move, and helping you re-house your custom documents and published links.

- Mobile app updates.
- Update your Workplace documentation and existing links.
- Reconfiguring SSO, if required.
- Plan URL changes for any app or custom integrations.
- Account Management (SCIM) and Graph APIs.
- Whitelist the new domain name.
- Answer your company's questions about the migration.
