

Military Applications

From Infrastructure to Recreation Facilities

Easi-Set Precast Concrete Buildings are used by the Army Corp of Engineers and other military branches for a variety of applications. This is due to our customizable options that cater to the stringent demands of military facilities. We constantly test and improve our products to withstand 150 mph wind loads, seismic disturbances, and Level 5 ballistics. Our products are pre-engineered, and can be pre-assembled before arriving to the job site. This results in reduced disruption to the jobsite and fewer individuals that require access.

From large scale industrial applications to a remote mountain top communications shelter, we have proven precast concrete solutions. Our past experience covers everything from park and recreation areas to utility systems and combat training facilities. Each project is completed within a minimum of hours or days once the building arrives, limiting the time needed for outside contractors to be on your secured premises, or interrupt your day-to-day operations.

Communications Buildings • Ammunition Storage • Guard Houses • Security Stations • Training Facilities • Classrooms • Shooting Range • Observation Towers • Data Centers • High-Security Storage • HazMat Storage • Electro-Mechanical • Garage & Maintenance Buildings • Operational HQ • Offices • Warehouses • Parks and Rec • Restrooms & More

Pre-Engineered • Minimal Site Preparation • Delivered To Site Ready To Use • Maintenance Free • Durable • Sustainable
