

**RE: CommScope Update on Coronavirus (COVID-19)**

The CommScope Business Continuity team continues to track the Coronavirus (COVID-19) outbreak globally. To ensure the wellbeing of our people, CommScope has introduced precautionary measures that align with government and health agency protocols. We know it is important that all CommScope employees follow these measures to ensure the health and wellbeing of their colleagues, families and the broader community.

Until otherwise posted, our cable and apparatus manufacturing facilities will continue to operate as normal. These facilities are fed by a robust supply chain of raw material that is globally diversified; as well as our capability to use different facilities to overcome any regional constraints.

The CommScope Supply Chain team is working closely with our suppliers to secure materials as well as with our logistics partners to manage shipments. While we may experience some issues from air freight in the region not being at full capacity, our goal is to minimize disruption to our customers, partners and market during this time.

CommScope is ramping up production in our Asian factories and have both Suzhou facilities running at +85% of normal rate compared to previous start up after the Chinese New Year. While all factories are operational, although at reduced staffing levels, we expect staffing levels to continue rising over the coming weeks while stabilization in region normalizes.

While we do not expect any issues in North America, we have developed a team to run a Corona Virus Information center; Lead by Darren Waddell Director, Global Business Continuity 1-828- 323-4940 this team is available to provide updated answers to any inquires that are virus specific.

For specific information about orders, please contact your CommScope Sales representative or customer service team. We will work diligently to get you a prompt response, as our teams are working to maintain standard working operations while trying to ensure the safety of our employees, customers and suppliers.

As this is a constantly evolving situation, we have restricted all non-essential domestic travel through March 27<sup>th</sup> 2020 and have asked our teams to use their best judgment and take personal accountability to avoid any situation that may require quarantine.

We appreciate your patience and thank you for your continued partnership.

Best regards

Martin Spiegel
