Re: Coronavirus

To Whom it may concern,

As you know, China is suffering from the effects of the Coronavirus which is causing Companies to shut down not only for Chinese New Year but also the week after.

Sumitomo's China facility followed the same and closed for two weeks but because of quarantine areas, the labor force currently is about 50% of normal.

Fortunately, SEIP receives only two products from our China plant for two specific customers and our inventory is sufficient to service those customers.

The remaining products are manufactured in the U.S., Japan or Taiwan and are not affect at all by the challenges in China.

As a matter of fact, SEIP is very close to realizing new manufacturing capacity and will be moving much of our imports to be manufactured in our U.S. facility over the next several months.

Please be assured that SEIP's products and deliveries are not affected by the unfortunate events in China.

Sincerely,

Dave Johnson
VP of Sales
Sumitomo Electric Interconnect Products, Inc.
