

SureCall Certified Installer Training

Finding Value in Offering Indoor Cellular Coverage: Is the Booster Market Where I Should Expand My Business?

Join us for this training session and become an official SureCall Certified Installer. Our live training and design support helps you design, deploy and optimize booster systems to maximize coverage and solve any in-building signal challenge.

Learn best practices for conducting a site survey, commercial product overview and deployment, optimizing, troubleshooting tips and more.

During the training, we will discuss how to find value in offering indoor cellular coverage and the booster market:

- Who is SureCall? Why should you partner with us?
- What is the size of the market?
- What causes a weak cellular signal? How does a distributed antenna system (DAS) work?
- What product is right for your customer? How do you host a site survey and install a booster system?
- Tools of the trade: how do you operate a Signal Meter?

June 22

8:30 to 10:00AM

Accu-Tech Minneapolis
9775 85th Avenue North
Suite 200
Maple Grove, MN 55369

Continental breakfast will be provided!
