

8 REASONS TO TRADE UP:

Liebert® GXT4™ On-Line UPS

BENEFITS

High availability doesn't have to come at the cost of efficiency with the Liebert® GXT4™ UPS. Offered in a variety of power capacities – from 500VA to 10kVA – this true on-line, double-conversion UPS offers a higher power factor, increased reliability, and helps ensure critical continuity through power disturbances of any kind.

BENEFITS

ADVANTAGE

1. Higher Availability.

The Liebert GXT4 UPS helps keep your most critical systems up and running, regardless of fluctuations in power. In the event of a longer power outage, the Liebert GXT4 UPS provides ample time for a graceful shutdown of IT systems, which helps prevent the loss of valuable data. Plus, the Liebert GXT4 UPS features fault-tolerant technology that allows it to provide power to equipment in the unlikely event of a UPS component failure.

2. 0.9 Output Power Factor.

By utilizing a high power factor, the Liebert GXT4 UPS allows you to use fewer UPSs in the data center, without sacrificing availability. This simplifies maintenance, reduces the number of battery replacements over the UPS's life and helps cut energy costs.

3. Controllable Outlets.

The 500-3000VA size GXT4 provides two pair of configurable outlets. These outlets can be programmed for load shedding to turn OFF when the UPS is in overload, when on battery for a programmable number of minutes, and when a programmable backup time remains. They can also be programmed to be always OFF in order to protect against unauthorized use.

4. Zero Battery Transfer Time.

With zero transfer time when switching to battery operation, the Liebert GXT4 UPS allows systems to continue operating seamlessly throughout power disturbances – ensuring that worker productivity is not disturbed by fluctuations.

5. Two-Year, No-Hassle Advanced Replacement Warranty.

Every Liebert GXT4 UPS comes with a two-year, no-hassle warranty to help protect your investment. Competitors require you to ship the UPS back for repair and pay for the shipping; Vertiv simply sends a replacement UPS and provides a prepaid shipping label.

6. Hot-Swappable Batteries.

The batteries in the Liebert GXT4 UPS make maintenance a streamlined, hassle-free process. And they can be switched without taking the connected equipment offline.

7. Optional External Battery Cabinet.

An optional 2U (3/6kVA model) or 4U (8/10kVA model) external battery cabinet can be used to extend the runtime of the Liebert GXT4 UPS, which helps further negate the effects of power disturbances and preserves critical availability.

8. 24x7, Toll-Free Support.

Vertiv provides industry-best service and support for every Liebert GXT4 UPS, so issues can be resolved quickly and critical continuity can remain seamlessly intact.

Remember:

When you buy our **Power Assurance Package** with your **Liebert GXT4 UPS**, you eliminate the need to send your old equipment back to us - we take care of all that for you! That means you get your rebate potentially weeks **faster** than when you buy just the hardware.

SWITCH TO THE LIEBERT GXT4 UPS TO HELP ENSURE AVAILABILITY OF YOUR BUSINESS-CRITICAL SYSTEMS.
