

# VICON ANALYTICS

POWERED BY INTELLIGENCE

With Vicon's true, standards-based open platform and Vicon Analytics, it is easy to seamlessly gain efficiencies in incident investigations and business operations.

With video analytics embedded in the IQeye family of Vicon cameras that seamlessly integrates into ViconNet video management software (VMS), video surveillance is no longer a passive tool, but an effective, proactive detection system.

## ALERTS CAN BE AUTOMATICALLY GENERATED IN REAL-TIME FOR:

### ● MOTION DETECTION

Vicon's advanced motion detector reduces the number of false alarms by intelligently analyzing motion in a scene and filtering out false triggers from lighting changes and non-human movements such as those made by animals and trees.

### ● CAMERA TAMPERING

Vicon Analytics monitors video to detect camera failures or tampering. Alerts will be generated when a camera lens is partially or completely blocked or the field of view or camera angle has been altered.

### ● INTRUSION DETECTION

Vicon Analytics provides automated perimeter monitoring to secure a specified area or zone and will monitor the area for people or vehicle intrusion.

With **Vicon Analytics** alerts are automatically generated without the need for an analytics server.

Vicon Analytics is seamlessly integrated with and supported by ViconNet VMS.

# VICON BUSINESS INTELLIGENCE SERVICES

UNLOCK THE VALUE OF ANALYTICS

Vicon recognizes the need to take analytics to the next level, where real business needs are solved by focused solutions.

## Vicon's Business Intelligence Services

is a developing concept that creates unique opportunities to turn video data into actionable insights that power better business decisions and improve the overall effectiveness of surveillance systems.

This program will be conceived to deliver a simple and affordable solution that provides access to fundamental business intelligence and can be deployed without compromising security or installing additional software or hardware.

With different subscription options to choose from, the cost of deployment, maintenance and operation are kept to a minimum and customers can begin collecting, analyzing and making data-driven security and business decisions in an easy and affordable way.

**WATCH FOR MORE EXCITING ANNOUNCEMENTS FROM VICON AS WE WORK TO GO BEYOND CONVENTIONAL ANALYTICS AND UNLOCK THE POTENTIAL OF VIDEO DATA.**

## ABOUT VICON

For 48 years, Vicon has been an experienced designer and manufacturer of video management software, high-performance megapixel IP cameras, video storage solutions and access control systems and is unrivaled in its experience in the surveillance market. Vicon combines a complete security solution with a vast team-ecosystem of business and technology partners to bring the most comprehensive security solution in the market. Vicon is dedicated to driving innovative technology and enabling users to deliver enhanced security protection and monitoring.

Vicon's premiere standards-based video integration platform, together with its revolutionary surveillance cameras and components are sold through an experienced network of highly trained installing dealers, system integrators and distributors.

For more information about Vicon, which is publicly traded on the New York Stock Exchange under the symbol "VII", please visit: [www.vicon-security.com](http://www.vicon-security.com).
