

Outsmarting Adversaries Together

Revolutionize how your security teams create, retain, apply and deliver analysis and investigation results with Avalon, the world's first cyber analysis delivery platform.

Integrate Diverse Data Sources

Conduct investigations more efficiently by bringing all data sources together and automating common analyst queries.

Interact in Real-Time

Enable real-time information sharing and collaboration by creating trusted groups within your organization or across your industry.

Visualize Threats and Connections

Quickly visualize and enrich threat data from all threat intelligence sources in a single interactive workspace.

Deliver Results

Reduce time spent on manual administrative tasks by easily creating, reviewing and delivering finished intelligence directly from Avalon

Preserve Investigations

Create a centralized knowledge repository to maintain investigative intelligence that can be utilized for future investigations.

25%

Of an analyst's time is spent on reporting & administrative tasks

200+

Hours per analyst recouped each year using Avalon

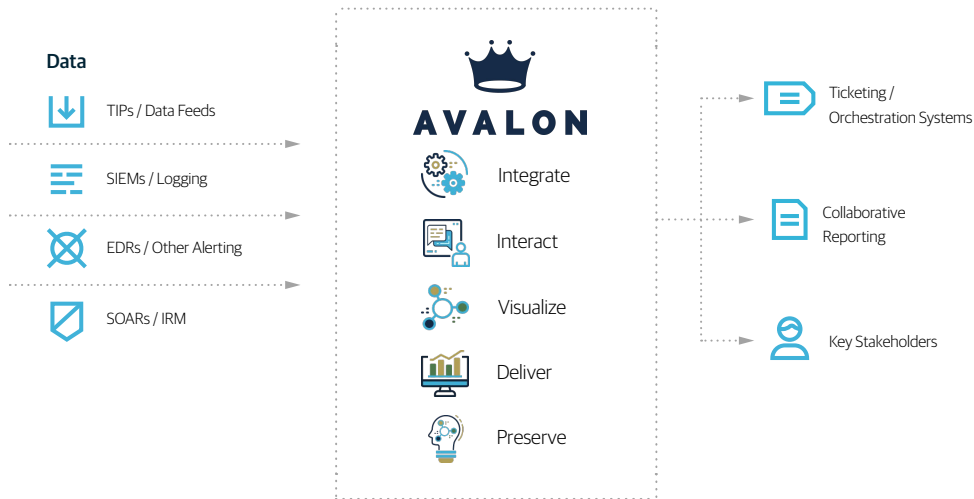

Up to

100%

increase in analysis and reporting efficiency

Avalon Simplifies Security Analysis & Reporting - Integrating All Tools & Data in One Place

Avalon integrates activities completed during the analysts' workflow, both inside and outside of Avalon, and helps security teams spend less time on manual, time-consuming administrative tasks and more time on security.

Avalon Features
