AVALON | **INTEL 471**

Avalon + Intel 471

A Perfect Union

In the battle against today's threats, understanding who your adversary is and how they operate is critical. Working together, the seamless integration between Avalon and Intel 471 empowers your security teams to easily visualize and enrich threat data with Intel 471's comprehensive adversary and malware intelligence and other sources within a single Avalon workspace. Using Avalon, teams can then collaborate and work together in real-time to efficiently investigate and deliver the finished intelligence needed throughout your organization.

Integration Highlights

Integrate Diverse Data Sources

Conduct investigations efficiently by seamlessly integrating threat intelligence from Intel 471 and other sources into a single Avalon workspace.

Interact in Real-Time

Enable real-time, secure collaboration across teams - or across your industry - to eliminate silos and increase analysis efficiency.

Visualize Threats and Connections

Quickly visualize and enrich threat data from Intel 471 to easily discover and understand data relationships.

Deliver Results

Say goodbye to email chains and manual administrative tasks by easily creating, reviewing and delivering finished intelligence directly from Avalon.

Preserve Investigations

Create a centralized knowledge repository to maintain the latest investigative intelligence that can be utilized for future investigations.

Integration Benefits

- Maintain a living knowledge base or workspace of threat actors and groups

- Link threat actors to malicious infrastructure associated with malware and other malicious activity

- Conduct collaborative investigations of threat actors and malware activity

- Triage threat actors and threat activity to determine significance and risk

- Key Stakeholders

INTEL471

King and Union

King and Union enables security teams to easily create and deliver the right intelligence to the right person across all levels of their organization by unifying data from multiple tools and results from investigations into a single cyber analysis delivery platform. With our platform, Avalon, security teams can quickly visualize threat data and investigate together in real time, and once complete, efficiently create and deliver the finished intelligence required to key stakeholders. Avalon reduces the time on manual, administrative tasks, leaving analysts more time to focus on security, and empowers organizations to take full advantage of the security investments they've made - in people, information and technology.

Intel 471

Intel 471 is the premier provider of cybercrime intelligence. Intel 471 provides adversary and malware intelligence for leading intelligence, security and fraud teams. Adversary Intelligence is focused on infiltrating closed sources where threat actors collaborate, communicate and plan cyber attacks. Malware Intelligence leverages our underground capabilities to provide timely data and context on malware and adversary infrastructure. Our team is comprised of intelligence operators located where cybercriminals formerly operated with impunity and without consequence. Our pedigree is unmatched, and we count upon a team with experience operating in the intelligence services and law enforcement in nearly every continent on earth.
