KING & UNION | **ThreatConnect™**

ThreatConnect + Avalon
A Perfect Union

None of us fight the battle against today's adversaries alone. Working together, ThreatConnect and Avalon empower your security and intelligence teams to easily visualize threat intelligence from multiple sources in a single, interactive platform, investigate threats in real-time, and efficiently deliver the finished intelligence you need. Take all the actionable intelligence from ThreatConnect and allow Avalon to visualize and report on it in a way that has not been done before.

Integration Highlights

INTERACT

Bring analysts together in trusted groups to outsmart your adversaries, together.

VISUALIZE THREATS

Quickly visualize and enrich threat data from ThreatConnect and all threat intel sources in a single interactive workspace.

DELIVER RESULTS

Reduce time spent on manual administrative tasks by easily creating, reviewing and delivering finished intelligence directly from Avalon.

PRESERVE INVESTIGATIONS

Create a centralized knowledge repository to maintain investigative intelligence that can be utilized for future investigations.

Integration Benefits

- Quickly unify, visualize and enrich threat intelligence in a single workspace to better understand data relationships

- Increase analysis and reporting efficiency - recouping 200+ hours per analyst per year

- Easily deliver the right finished intelligence to the right person in the right format

- Enable analysts to focus on what they do best - security - instead of administrative tasks

- Preserve past analyses to enrich future investigations.

Avalon Simplifies Security Analysis & Reporting – Integrating All Tools & Data in One Place

Avalon integrates activities completed during the analysts workflow, both inside and outside of Avalon, and helps security teams spend less time on manual, time-consuming administrative tasks and more time on security.
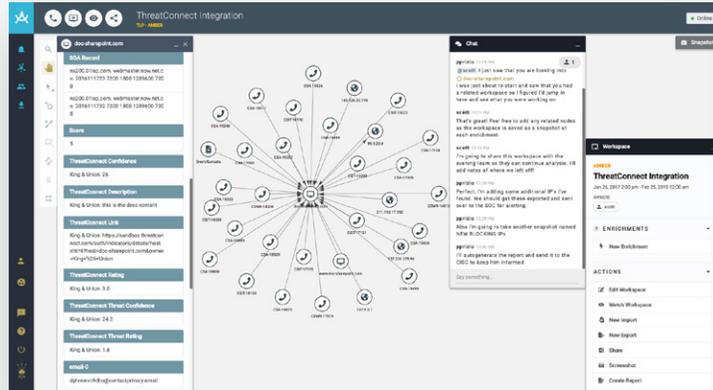

King and Union

King and Union enables security teams to easily create and deliver the right intelligence to the right person across all levels of their organization by unifying data from multiple tools and results from investigations into a single cyber analysis delivery platform. With our platform, Avalon, security teams can quickly visualize threat data and investigate together in real time, and once complete, efficiently create and deliver the finished intelligence required to key stakeholders. Avalon reduces the time on manual, administrative tasks, leaving analysts more time to focus on security, and empowers organizations to take full advantage of the security investments they've made - in people, information, and technology.

ThreatConnect

ThreatConnect fuses intelligence, automation, orchestration, and response to enable organizations of any size to be more predictive, proactive, and efficient. Designed by analysts, but built for the entire team™, the ThreatConnect Platform has use cases for threat intelligence, security operations, incident response, and security management. With your entire team and all your knowledge in one place, you will drastically improve your ability to put security data in context with intelligence and analytics, establish process consistency with playbooks, workflows and a centralized system of record, and measure the effectiveness of your organization with cross-platform analytics and customizable dashboards.
