

## Avalon + Recorded Future

# A Perfect Union

None of us fight the battle against today's adversaries alone. Working together, Recorded Future and Avalon empower your security and intelligence teams to easily visualize threat data from multiple sources in a single, interactive platform, investigate threats in real-time, and efficiently deliver the finished intelligence you need. Take all the actionable intelligence from Recorded Future and allow Avalon to visualize and report on it in a way that has not been done before.

### Integration Highlights

#### Integrate Diverse Data Sources

Conduct investigations more efficiently by bringing all data sources together and automating common analyst queries.

#### Interact in Real-Time

Enable real-time information sharing and collaboration by creating trusted groups within your organization or across your industry.

#### Visualize Threats and Connections

Quickly visualize and enrich threat data from Recorded Future and all threat intelligence sources in a single interactive workspace.

#### Deliver Results

Reduce time spent on manual administrative tasks by easily creating, reviewing and delivering finished intelligence directly from Avalon.

#### Preserve Investigations

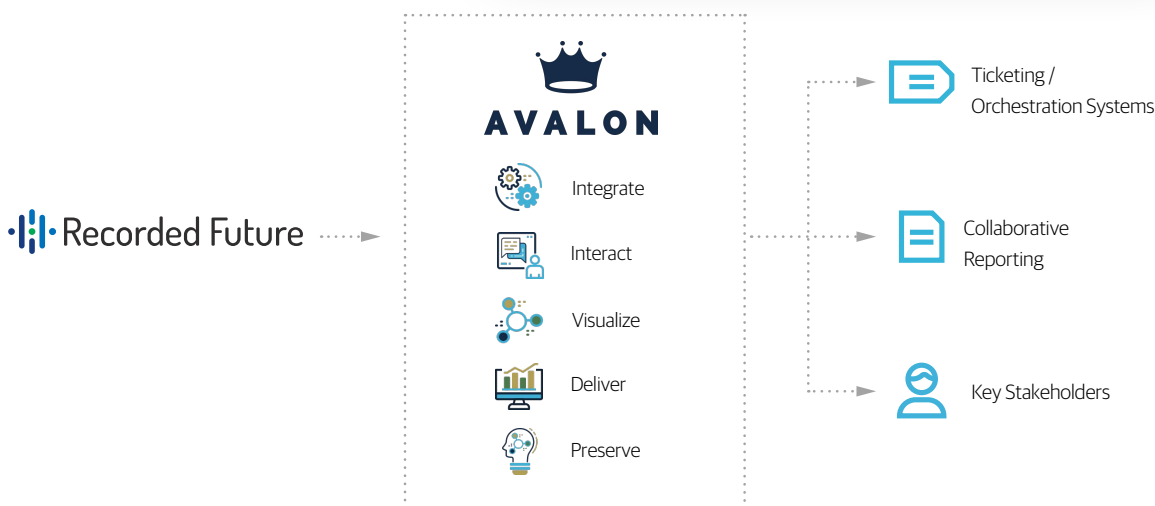

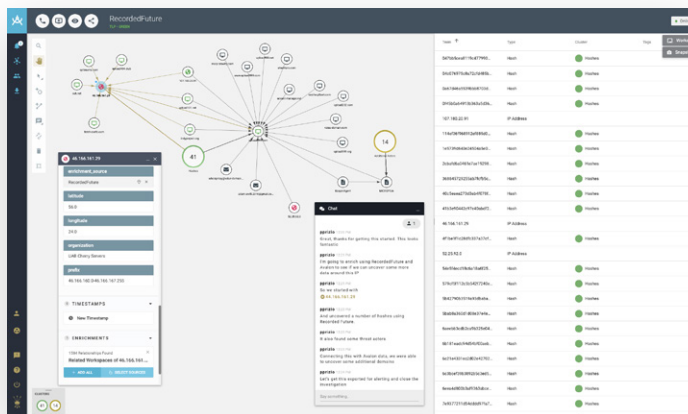

Create a centralized knowledge repository to maintain investigative intelligence that can be utilized for future investigations.

### Integration Benefits

- Quickly unify, visualize and enrich threat intelligence in a single workspace to better understand data relationships
- Increase analysis and reporting efficiency - recouping 200+ hours per analyst per year
- Easily deliver the right finished intelligence to the right person in the right format
- Enable analysts to focus on what they do best - security - instead of administrative tasks
- Preserve past analyses to enrich future investigations.

## Avalon Simplifies Security Analysis & Reporting - Integrating All Tools & Data in One Place

Avalon integrates activities completed during the analysts workflow, both inside and outside of Avalon, and helps security teams spend less time on manual, time-consuming administrative tasks and more time on security.

### King and Union

King and Union enables security teams to easily create and deliver the right intelligence to the right person across all levels of their organization by unifying data from multiple tools and results from investigations into a single cyber analysis delivery platform. With our platform, Avalon, security teams can quickly visualize threat data and investigate together in real time, and once complete, efficiently create and deliver the finished intelligence required to key stakeholders. Avalon reduces the time on manual, administrative tasks, leaving analysts more time to focus on security, and empowers organizations to take full advantage of the security investments they've made - in people, information and technology.

### Recorded Future

Recorded Future delivers the only complete threat intelligence solution powered by patented machine learning to lower risk. We empower organizations to reveal unknown threats before they impact business, and enable teams to respond to alerts 10 times faster. To supercharge the efforts of security teams, our technology automatically collects and analyzes intelligence from technical, open, and dark web sources and aggregates customer-proprietary data. Recorded Future delivers more context than threat feeds, updates in real time so intelligence stays relevant, and centralizes information ready for human analysis, collaboration, and integration with security technologies. 91 percent of the Fortune 100 use Recorded Future.
