

ACCOUNT RECONCILIATION

HAS NEVER BEEN FASTER, EASIER OR MORE ACCURATE!

GET A COMPLETE FINANCIAL SNAPSHOT

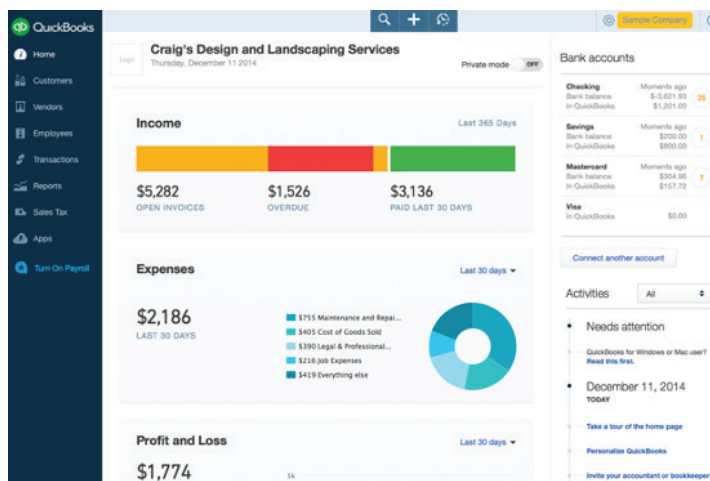

With Fusebill's QuickBooks integration, data is synchronized at a granular level so that your accounting department can drill down into customer accounts and see their activity [without needing to change applications](#). The same information can be summarized into monthly reconciliation reports and used with other QuickBooks data to provide you with rich analysis and reporting capabilities.

How does it work?

You can now manage all the financial needs of your recurring revenue business with the [seamless integration](#) of your high-volume *transaction data* from Fusebill with your *accounting data* in QuickBooks.

This integration eliminates the complexity that a recurring revenue business model brings to invoicing and accounting processes. Fusebill automates your [recurring billing](#) and manages your accounting and month-end close process. Your detailed recurring transactions captured in Fusebill are automatically synced to your accounts receivable and cash ledgers in QuickBooks.

Fusebill's integration with QuickBooks is easy and seamless, and means you will have more time to set strategic goals, analyze trends in your financial data, and make more informed business decisions. Here's how it works: Customers are set up in the Fusebill system and auto-sync to QuickBooks in real-time. Fusebill's powerful ledger-based platform organizes and maps your data in a similar way to QuickBooks. Your Fusebill product catalog is automatically synced to QuickBooks as one single product - making it easy to find and report on. Payments for invoices that are synced to QuickBooks can be posted to an "Un-deposited funds" ledger for easy bank reconciliation with deposits from bank statements.

Fusebill automates your adjustments to invoices. These adjustments, including discounts, credits, write-offs, and reversals, are fully synced to QuickBooks so that your customer balances remain correct throughout the lifecycle of their transactions. U.S. and Canadian taxes can be easily mapped from Fusebill to QuickBooks so that your tax remittance can be calculated without any extra steps.

Fusebill's feature-rich platform has given us a powerful way to seamlessly manage our entire subscription business from billing to account management. Fusebill is the Swiss Army of billing.
