UNIFIED COMMUNICATIONS, TEAM MESSAGING, FILE SYNC & SHARE

PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes Streams, its business-class, HIPAA secure, ultra-reliable, futureproof unified cloud service that can be deployed world-wide.

Streams includes unified communications and team messaging infrastructure with a next-generation cloud-

based solution and **Smart-Box**, its HIPAA secure, enterprise cloud file storage, sync & share service.

With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

Let's face it – we can't all be in the same place at the same time. So, how do we continue to communicate with the office staff, the shipping/receiving department, and the plant personnel without losing time and maintaining consistency? Traditional voice solutions – voicemail, teleconferences, video conferencing, etc. require multiple products, applications and services. Add to that all the other communications that we use on a daily basis to maintain network synchronicity and the costs and headaches are compounded.

Enter the PanTerra Network where business communication to us is everything unified regardless of location or job function, including digital business voice, video, fax, email, contact, file sharing, calendar, chat, instant message, presence, conferencing, webinars and desktop sharing all provided through one interface.

With PanTerra, multiple department and facility support is not

a definition with physical demands or limitations; it is simply a configuration setting. Complete freedom to present your customers and employees with a clear and concise message that best suits your business needs. When you have plants scattered across the globe, our multi-site billing detail allows you to break down costs per user/per site so you have complete visibility for usage, plans and activity. If a summary is all you require, simply change a setting to the consolidated view.

Eliminate CAPEX Costs. With PanTerra's PanTerra service, buying CAPEX for multiple facilities/locations is a thing of the past. PanTerra services run in a reliable data center and are delivered to you "on-demand" through your existing data network.

Unify Communications. At PanTerra Networks, we solve the communications dilemma by unifying all of your communica-

tions needs. PanTerra provides a complete one-stop-shop for all of the communication, collaboration, file sharing, contact center and messaging services required to run your company.

- Connect all of your users through one, unified communications platform
- Collaborate with customers and co-workers around the globe
- Consolidate your voice traffic, and manage your globally distributed telephony solution through one simple interface
