PanTerra

STREAMS

Large businesses are reviewing their human resource requirements with scrutiny and releasing employees at an alarming rate. In many cases, the released individuals are hired right back on a consulting basis driving a substantial amount of the consulting growth to date. Many of the consulting businesses are formed by groups of people just like this who have worked together in the past, bringing together complementary skills and often customers. Rarely do consultants have established businesses, so they are starting from scratch and many times have been exposed to large communication budgets experiencing the positive impact technology can have on a business. A lot to think about, but PanTerra delivers complete communication services so consultants can focus their time and energies on their specialties.

A communications solution not tied to any physical location. When renting office space, purchasing expensive

equipment and commuting to work is not part of the plan, PanTerra is a key component. Wherever you have a browser, you are attached to PanTerra. Whether you work from your home office or are required to work from your clients' locations, you can access everything you need – anytime, anywhere, any device.

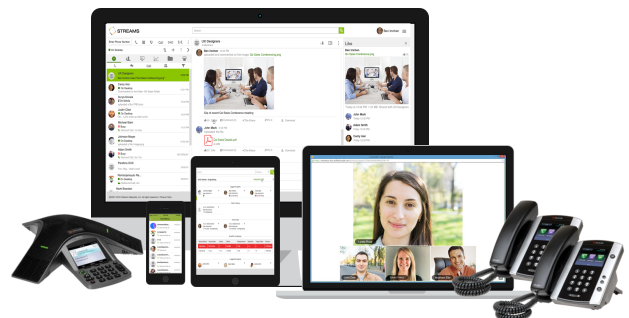

Communicating through a variety of mediums. Many consultants require the ability to communicate with their clients via phone, fax, text, instant messaging, conferencing, etc. With PanTerra, consultants can stay in contact with their clients in the best way possible. When a document needs immediate changes before signature, when a client isn't certain about how to do something, or when collaboration is required to make a time sensitive decision. PanTerra Streams and SmartBox gives you every communication vehicle you would ever need, and more!

The PanTerra Advantage. PanTerra can save you over 75% on your current communi-

cations costs while providing all the benefits of cloud-based Unified Communications, including instant access to services, infinite scalability and growth, elimination of on-premises hardware and software obsolescence, consistent reliable infrastructure for multiple locations, remote users and mobile workforce, optimized disaster recovery capability, maximum flexibility and futureproof continuous feature upgrades. PanTerra brings your communications infrastructure into the 21st century!
