SmartBand MPLS: Secure Cloud Access

Moving your IT services to the cloud saves money, improves service consistency and eliminates IT obsolescence. However, connecting to the cloud in a manner that ensures an acceptable level of secure and quality of service can be challenging.

SOLUTIONS

BY SIZE

Enterprise	Mid-size	Small

BY FUNCTION

Business Continuity	Call Center	Franchise
Mobile Workforce	Multi-Location	Franchisee
Salesforce Open CTI	SmartBand MPLS	TotalCare
MPLS-Connect	Business Analytics	SmartCPE
SmartBand	Reliability	Support
Security	Value Proposition	

BY MARKET

## UNIFIED COMMUNICATIONS, TEAM MESSAGING, FILE SYNC & SHARE

PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes Streams, its business-class, HIPAA secure, ultra-reliable, futureproof unified cloud service that can be deployed world-wide.

Streams includes unified communications and team messaging infrastructure with a next-generation cloud-based solution and Smart-Box, its HIPAA secure, enterprise cloud file storage, sync & share service.

With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

STREAMS

PanTerra

Moving your IT services to the cloud saves money, improves service consistency and eliminates IT obsolescence. However, connecting to the cloud in a manner that ensures an acceptable level of secure and quality of service can be challenging.

PanTerra understands those challenges and offers a secure connectivity solution, SmartBand MPLS. From design and implementation to world-class maintenance and support, SmartBand MPLS delivers the most comprehensive, secure and highest level of quality of service. SmartBand MPLS gives customers:

A dedicated "human-intensive" consultative approach with pre-sales, network-certified design teams that give customers direct access to highly qualified engineers.

Design documentation that includes a detailed rack view network diagram showing how PanTerra MPLS will integrate specifically to the customer's network infrastructure.

The only converged offering in the industry with fully meshed data services support in addition to voice QoS for crystal clear calls.

Access to a full spectrum of speeds (up to 1Gbps) and circuit types including Metro Ethernet, EoC, FastE, Bonded T1, T1 and OCx.
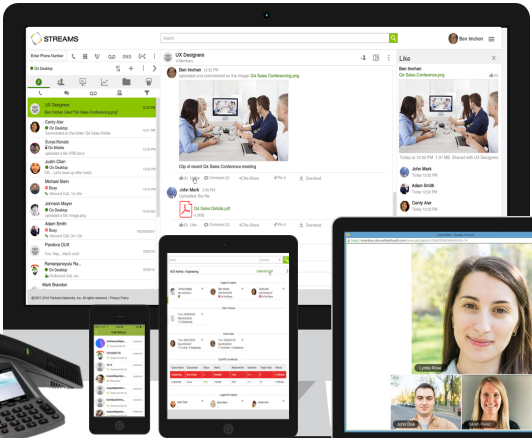

Fail-over to any Internet Connection (not limited to another MPLS circuit) that gives unprecedented flexibility and resilience to your voice network.

Real-time circuit fail-over with voice-aware routers that guarantee business continuity and keep active calls connected.

Proactive 24/7 monitoring and management allowing IT departments to focus on other business initiatives.

SmartBand MPLS is configured, deployed and managed by PanTerra, providing a single vendor solution for both network and cloud services, reducing IT cost, management and complexities.
