PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes **Streams**, a complete unified communications and collaboration service. PanTerra also includes **SmartBox**, the world's first communications-enabled file sync & share service. All PanTerra services can be self-managed by customers or authorized partners, or subscribed to as a fully-managed service with **Sentra-Cloud**. With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

Being able to upload and download large files has always been an issue for advertisers. You have to manage file versions, meet deadlines, and communicate with clients. With SmartBox, you no longer have to wonder whether you have the most recent file – SmartBox keeps track for you with file versioning. Worried about sharing proprietary or confidential information with the wrong people? Not an issue with SmartBox - simply share folders and files implicitly or explicitly with your clients, graphic designers and project leads and assign them the appropriate permission level – co-owner, editor, or viewer. Why rely on outdated and overloaded FTP systems – with SmartBox those days are over.

Upload and Download Files. Graphics files can be shared individually with a link or as a folder with a Guest Account for your clients and collaborators. Which means, you no longer have to rely on antiquated FTP protocols for uploading and/or downloading client files.

Collaborate with your Team. Create a web meeting – audio and video – with your team and collaborate straight from SmartBox. Or, when you simply need a quick decision, send an instant message to a team member.

Manage File Versions. Be certain you are working from the most current version of all your files/folders. And, when you need to recover deleted files/folders, they are easily recoverable with a click of your mouse.

Secure and Confidential Access. All of your documents are safe with SmartBox with encryption technology and 2-phase authentication. And, when sharing proprietary information with potential clients and outside consultants, set up your files/folders with password protection.

The SmartBox Advantage. SmartBox's cloud-based file sharing and unified communications are designed with the features every business requires that seamlessly integrates file sharing, communications and collaboration features together to improve productivity, responsiveness and information flow between employees, offices and clients. The SmartBox solution is exactly what your business has been waiting for!
