PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises.  PanTerra includes **Streams**, a complete unified communications and collaboration service.  PanTerra also includes **SmartBox**, the world's first communications-enabled file sync & share service. All PanTerra services can be self-managed by customers or authorized partners, or subscribed to as a fully-managed service with **Sentra-Cloud**. With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

If you can scan a document or blueprints, you can share them with SmartBox. Builders and architects need to be flexible with their designs and they need to have access to standard forms and requisition templates. With SmartBox, you can store and share all of your documents and share them with your foremen, carpenters, plumbers, electricians so that everyone on your crew is working from the same revision order. When the architect moves the kitchen into the living room and the pantry into the bathroom, everyone needs to know about it. Need an immediate design decision? Simply share a file and click to start a web conference right from SmartBox. Communication has never been simpler.

**Upload and Download Files.** Blueprints and architect specs can be uploaded/downloaded as necessary, regardless of file size or type. And, when you need to share CAD diagrams with your clients and team, SmartBox can handle the load.

**Collaborate with your Team.** Instant message with your team and collaborate straight from SmartBox. Keep all of your contractors up-to-date on the latest specs, drawings, contracts, by clicking on a shared folder and launching a video conference.

**Be certain that you are the only one working on a shared file.** With SmartBox, you can lock a file while you're working on it, make changes to specs, drawings, etc. and then reload the most current version. And, if you need to go back to a past version – simply click the Trash Bin icon and your file is easily recoverable.

**Secure and Confidential Access.** When you need to keep proprietary information secure, SmartBox is there with encryption technology and 2-phase authentication. And, when you need to know who is accessing shared documents, set up global or individual notifications.

**The SmartBox Advantage.** SmartBox is designed with the features every business requires that seamlessly integrates file sharing, communications and collaboration together to improve productivity, responsiveness and information flow between employees, offices and clients. SmartBox was built with you in mind.
