SMARTBOX

PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes **Streams**, a complete unified communications and collaboration service. PanTerra also includes **SmartBox**, the world's first communications-enabled file sync & share service. All PanTerra services can be self-managed by customers or authorized partners, or subscribed to as a fully-managed service with **SentraCloud**. With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

Is your filing system forcing you to spend money on additional headcount just to keep it organized? What if you could file your client communications – emails, faxes, voicemails and text messages in one location and accessible to whomever you give permission to? With SmartBox, you'd be able to assign viewer-only privileges to clients, with a time-limit on access and encryption so that all documents are secure. Your industry is all about trust and secure information. With SmartBox, you can be sure that your information is always accessible, always secure, and always exactly where you need it – desktop, laptop, tablet, notebook or smartphone.

Keep documents organized and accessible. Your policy adjusters and field agents need to have up-to-date contracts, policies, and fee schedules available wherever they do business – in and out of the office. With SmartBox, standard forms and policies are always available at the click of a mouse.
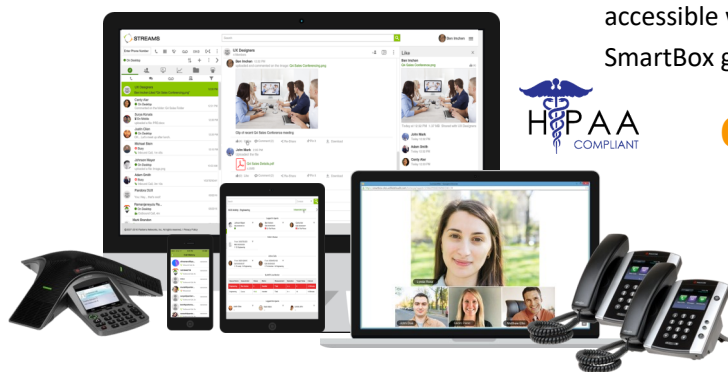

Independent device syncing. Take SmartBox with you to your clients' home and have all files available and accessible whenever you need them. SmartBox gives you the unique ability to sync specific information to specific devices. The user decides where to store critical information locally.

Collaborate with your Team. Keep all of your field agents, clients and internal staff up-to-date on the latest policies, vertical markets, fees, and contracts. With SmartBox, you can launch a web conference, send group instant messages, and even set up a recurring video conference.

Secure and Confidential Access. When you need to keep proprietary information secure, SmartBox is there with encryption technology and 2-phase authentication. Even when a device has been lost or stolen, you have complete control. Additionally, set up global or individual notifications so you are always aware of who has accessed the shared information.

The SmartBox Advantage. SmartBox is designed with the features every business requires that seamlessly integrates file sharing, communications and collaboration together to improve productivity, responsiveness and information flow between employees, offices and clients. SmartBox was built with you in mind.
