PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes **Streams**, a complete unified communications and collaboration service. PanTerra also includes **SmartBox**, the world's first communications-enabled file sync & share service. All PanTerra services can be self-managed by customers or authorized partners, or subscribed to as a fully-managed service with **Sentra-Cloud**. With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

Proprietary information and confidential property require the utmost in security. Time sensitive and court documents that go through multiple versions before being released demand immediate turn-around capabilities. SmartBox gives you the ability to lock documents, share only with those who need access and a quick way to communicate so that deadlines are met and deleted versions are easily recovered or shredded, if necessary, to maintain a security level that is unmatched in cloud storage.

Keep documents organized and accessible. Government documents can be difficult to manage, massive in size and a nightmare to organize – until now. With SmartBox, standard forms, documents and versions are always available at the click of a mouse.

Independent device syncing. Make teleprompters a thing of the past – most current speeches are at your fingertips and always available. SmartBox gives you the unique ability to sync specific information to specific devices. The user decides where to store critical information locally for use when and where it's needed.

Collaborate with your Team. Keep all of your administrative and executive staff up-to-date on the latest policies, regulations, talking-points, and confidential intelligence. With SmartBox, you can launch a web conference, send group instant messages, and even set up a recurring video conference.

Secure and Confidential Access. When you need to keep confidential information secure, SmartBox is there with encryption technology and 2-phase authentication. Even when a device has been lost or stolen, you have complete control. Additionally, set up global or individual notifications so you are always aware of who has accessed the shared information.

The SmartBox Advantage. SmartBox is designed with the features every business requires that seamlessly integrates file sharing, communications and collaboration together to improve productivity, responsiveness and information flow between employees, offices and clients. SmartBox was built with you in mind.
