

PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes **Streams**, a complete unified communications and collaboration service. PanTerra also includes **SmartBox**, the world's first communications-enabled file sync & share service. All PanTerra services can be self-managed by customers or authorized partners, or subscribed to as a fully-managed service with **Sentra-Cloud**. With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

In the technology industry, you need high levels of security, the ability to access information from any location, and be able to communicate at a moment's notice. With SmartBox, you have multiple ways to access and share files and documents in the cloud. With sub-folder share settings, you can explicitly share sensitive documents with only those people you choose – no more are you handcuffed to global sharing and duplicate file copies. You take care of your core competencies and let SmartBox take care of your cloud storage.

**Accessible on any device - anywhere.** Every employee, vendor and contractor has access through a desktop browser or on any mobile device. Take SmartBox with you to tradeshows, customer locations, or anywhere you need to have access to all of your important documents. And, whether you're at your desk, in the board room or on the road, you have access through a desktop browser or on any mobile device.

**Communications stored in the cloud.** Record and save client consultations, voicemails, emails, and instant messages so that you can refer

back to them as necessary to stay current on all vendor, customer, and contractor communications. All of your communications are accessible in one convenient location – in the cloud.

**Control access to information.** Assign permission levels on folders and files – viewer, editor, or co-owner – so that partners, paralegals and clients have only the access you set for them. Additionally, Password-protect documents at any level – login, folder, and file.

**Secure and confidential access.** When you need to keep proprietary and confidential information secure, SmartBox is there with encryption technology and password protection. Keep tabs on who is accessing files/folders by setting up global or individual notifications.

**The SmartBox Advantage.** SmartBox is designed with the features every business requires that seamlessly integrates file sharing, communications and collaboration together to improve productivity, responsiveness and information flow between employees, offices and clients. SmartBox was built with you in mind.
