

PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes **Streams**, a complete unified communications and collaboration service. PanTerra also includes **SmartBox**, the world's first communications-enabled file sync & share service. All PanTerra services can be self-managed by customers or authorized partners, or subscribed to as a fully-managed service with **Sentra-Cloud**. With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

One of the best ways to avoid lawsuits is by maintaining a high-level of security with all documents and communications. Client-attorney trust is the cornerstone of any legal profession. Attorneys can feel comfortable in knowing SmartBox is completely encrypted, password protected, and only accessible to those with whom they choose to share documents. Communications have never been more secure.

Secure and confidential access.

When you need to keep confidential information and client files private and secure, SmartBox is there with encryption technology and password protection. Keep tabs on who is accessing files/folders by setting up global or individual notifications.

Keep documents organized and accessible. Government documents can be difficult to manage, massive in size and a nightmare to organize – until now. With SmartBox, standard forms, documents and versions are always available at the click of a mouse.

Access from any device - anywhere. Stay organized and have instant access to contracts, court documents,

and schedules from any device. With unique device syncing options, keep only the documents you need on the device you choose.

Control access to information. Assign permission levels on folders and files – viewer, editor, or co-owner – so that partners, paralegals and clients have only the access you set for them. Additionally, Password-protect documents at any level – login, folder, and file.

Communications stored in the cloud. Record and save client consultations, voicemails, emails, and instant messages so that you can refer back to them as necessary to assist with billing and case prep work. All of your communications will be accessible in one convenient location.

The SmartBox Advantage. SmartBox is designed with the features every business requires that seamlessly integrates file sharing, communications and collaboration together to improve productivity, responsiveness and information flow between employees, offices and clients. SmartBox was built with you in mind.
