

PanTerra Networks is a unified cloud service provider, delivering its family of secure, ultra-reliable, future-proof solution for SMB and Mid-market enterprises. PanTerra includes **Streams**, a complete unified communications and collaboration service. PanTerra also includes **SmartBox**, the world's first communications-enabled file sync & share service. All PanTerra services can be self-managed by customers or authorized partners, or subscribed to as a fully-managed service with **Sentra-Cloud**. With PanTerra's unified cloud service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support available, while significantly lowering their total cost of operations and IT administration complexities.

Don't let uploading and downloading of CAD drawings weigh you down. Blueprints, diagrams, drawings – stay up-to-date on the latest revisions. You can even restore the revision that's already been deleted/modified with just a simple click of the mouse. Your manufacturing business requires that all of your processes be documented and updated on a frequent basis. With SmartBox, you know your employees are working from the right specs for your customers every time.

**Upload and Download Files.** CAD drawings can be shared individually with a link or as a folder with a Guest Account for your clients and collaborators. Which means, you no longer have to rely on antiquated FTP protocols for uploading and/or downloading large files.

**Collaborate with your Team.** Launch a web meeting – audio or video – right from SmartBox and discuss time-sensitive changes in specs and processes. Share folders and files with those you choose and at any level within the directory structure.

**Manage File Versions.** Be certain you are working from the most current version of all your files/folders.

Lock the file while you're working on it, make changes to specs, drawings, etc. and re-load. And, when you need to recover deleted files/folders, they are easily recoverable with a click of your mouse.

**Keep proprietary documents secure.** You control who has access to sensitive and proprietary documents – sales, marketing, contractors, etc. by setting up privileges each time you share – viewer, editor or co-owner. All of your documents are safe with SmartBox with encryption technology and 2-phase authentication. Set up your notifications globally or individually so you know when someone has accessed proprietary and confidential files/folders.

**The SmartBox Advantage.** SmartBox's cloud-based file sharing and unified communications are designed with the features every business requires that seamlessly integrates file sharing, communications and collaboration features together to improve productivity, responsiveness and information flow between employees, offices and clients. The SmartBox solution is exactly what your business has been waiting for!
