

On Thursday, March 19th the Department of Homeland Security and CISA identified 16 critical infrastructure sectors whose assets, systems, and networks, whether physical or virtual, are considered so vital to the United States that their incapacitation or destruction would have a debilitating effect on security, national economic security, national public health or safety, or any combination thereof.

Drake Industries plays a major role as a key supplier to companies that are considered critical infrastructures according to CISA and will continue to operate during the span of the COVID-19 Pandemic. We continue to closely monitor this rapidly evolving situation and any potential impact on the full supply chain.
