

Xy5

Learning content management has never been easier

Create Content for the Modern Learner

Using a simple, intuitive interface, Xyleme provides content developers a platform that lets them rapidly build or reuse content and publish responsive eLearning, mobile books and slides, classroom guides for leaders and participants, and more.

KEY FEATURES

- Content / User Management and Security
- Collaborative Authoring
- Print and Responsive Web Publishing
- Online Content Reviews
- Translation Management

Deliver Learning Anywhere, Anytime

The delivery cloud is the key to rapid maintenance – as content changes, it is published to the cloud and participating learning and business systems get the most current content instantly.

- Content Repository
- On-Demand, Anywhere, Anytime, Any Device
- Dynamic Content Updates and Delivery
- Granular Search
- Simple Content Integration
- Open API

Analyze the Effectiveness of Your Learning Content

By delivering your content from the cloud you can measure its usage anywhere in the learning ecosystem — at the object level. The data provides new insights into what content is effective and can be correlated to business results through integration with other BI tools.

- Learning Record Store / xAPI
- Analytics Dashboards
- Integration with BI Tools

Why Do You Need Xyleme?

- Manage every aspect of your learning content from one platform
- Increase the efficiencies of your content development and management processes
- Provide both formal and informal learning
- Store your content in a single, searchable repository
- Make your content available on-demand, anywhere, anytime, on any device
- Analyze learner engagement with your learning content
- Take advantage of our deep domain expertise in learning content management
- Benefit from the most advanced cloud technologies for reliable performance and scalability
