QPR Software’s Corporate Governance Statement 2016

Corporate Governance Code

COMPLIANCE WITH THE CORPORATE GOVERNANCE CODE

QPR Software Plc complies with the Corporate Governance Code 2015, issued by the Finnish Securities Market Association, from the beginning of the financial year starting on January 1, 2016.

DEVIATION FROM RECOMMENDATIONS

QPR Software complies with the Finnish Corporate Governance Code with the following exception: the Board of Directors has not established any committees. There are no separate committees, as the Board has not considered these necessary in view of the size of the Group, extent of the operations and existing monitoring systems. The Board as a whole is responsible for fulfilling the tasks of an audit committee and other committees. Further, in view of the size of the Group, extent of the operations and existing monitoring systems, the Board has not considered these necessary of having a specific decision-making procedure for related party transactions.

OPERATIONS IN 2016

The Board of Directors assembled 12 times during 2016. The average participation percentage was 90. The Board of Directors made a self-assessment of its operation. The Board has not established any committees.

COMMITTEES

There are no separate committees, as the Board has not considered these necessary in view of the size of the Group, extent of the operations and existing monitoring systems. The Board as a whole is responsible for fulfilling the tasks of an audit committee and other committees.

Supervisory board

QPR Software Plc does not have a supervisory board.

CHIEF EXECUTIVE OFFICER

Mr. Jari Jaakkola (born 1961) has been the Chief Executive Officer of QPR Software Plc since January 2008. He has been employed by the Company and been a Member of Executive Management Team since August 2006.

Jari Jaakkola’s previous experience covers leadership positions in Sonera Corporation and Metsä Board Corporation. His past roles include lead responsibilities in large international equity and finance operations, investor relations, strategic marketing and brand management as well as in corporate communications and corporate affairs. Mr. Jaakkola holds a B.A. degree in journalism from Tampere University and an MBA from Henley Business School (United Kingdom).

Mr. Jaakkola held 240,000 shares of QPR Software Plc at December 31, 2016. His 100% owned company Value FM Ltd held 8,000 shares of QPR Software Plc at December 31, 2016.

DUTIES OF THE CHIEF EXECUTIVE OFFICER

QPR's Board of Directors appoints the CEO and decides the terms of his/her service contract. The CEO's terms of service have been agreed on in writing. The CEO is not appointed for a certain term, but is appointed indefinitely until further notice is given.

The CEO's duty is to manage the company's activities in accordance with the Finnish Companies Act and the Board of Directors' instructions and rules and to inform the Board of Directors about the development of the company's business and financial situation. The CEO is also responsible for arranging the company's day-to-day administration and ensuring that the financial administration of the company has been arranged reliably. The CEO primarily presents matters in Board meetings and is responsible for preparing proposals for Board's decisions.

Internal control and risk management

INTERNAL CONTROL

Internal control and risk management in QPR Software Group aims to ensure that the Group operates efficiently and effectively, distributes reliable information, complies with regulations and operational principles, reaches its strategic goals, reacts to changes in the market and operational environment, and ensures continuity of its business.

It is the duty of the Board of Directors to monitor the appropriateness, effectiveness and efficiency of risk management and internal control in QPR Software Group. Risk management report covering the risks presented in the Risk Management section is presented to the Board in connection with quarterly financial reporting.
The threat caused by the risks to shareholders is used as a criterion when the Board of Directors evaluates these risks. The Board of Directors also monitors that the Company has defined operational principles for internal control and that the Company monitors the effectiveness of internal control.

**INTERNAL CONTROL AND RISK MANAGEMENT SYSTEMS ASSOCIATED WITH FINANCIAL REPORTING**

The ultimate responsibility for accounting and financial administration lies with QPR Software Plc’s Board of Directors. The Board is responsible for internal control, and the CEO is responsible for the practical arrangements and monitoring of the control system.

The steering and monitoring of business operations is based on the reporting and business planning system covering the entire Group. The CEO and CFO give both Board and Executive Team meetings presentations of the Group’s situation and development based on monthly reports.

**RISK MANAGEMENT**

Coordination of the Group’s risk management and internal control and the related reporting is the responsibility of the Chief Financial Officer. Risk management in the Group is guided by the requirements of legislation, shareholders’ expectations regarding business objectives and expectations among important stakeholders, such as customers and personnel.

Risk management in the Group aims systematically and comprehensively to identify risks related to its operations and ensures that risks are managed and taken into account in decision making. The Group does not have a separate risk management organization, and risk management is part of routine responsibilities throughout the organization. Risk management is developed by constantly improving operative processes in the Group.

Risks are identified by their essentiality: if actualized, the risks selected for monitoring would have a material impact on the Group’s business operations.

QPR Group has identified the following three groups of risks related to its operations:

- risks related to business operations,
- risks related to information and products;
- risks related to financing.

Property, operational and liability risks are covered by insurance.

QPR Software Plc’s Management System has received ISO 9001:2015 quality certification covering the Company’s all activities, which is audited annually by an external party.

**Risks related to business operations**

The following risks are related to QPR Software’s business operations:

- **Country risk.** The instrument used for measuring risk is the potential loss of country-specific revenue. Risk is managed by constantly gathering market information and by conducting a business that is spread geographically and across different industries.
- **Customer risk.** The instruments used for measuring the risk is the software maintenance customer churn and the share of overdue accounts receivables of all receivables (%). Risk is managed by taking good care of every customer and reseller, as well as, by active follow-up and collection of accounts receivables.
- **Personnel risk.** The instrument used for measuring the risk is personnel churn. Risk is managed by professional recruitment, professional supervisory work and by securing possibilities for job rotation as well as for learning and growth.

- **Legal risk.** The instrument used for measuring the risk is cumulative euro-value of all open legal disputes compared to annual net sales (%). The risk is managed by in-depth knowhow of contractual law, standard terms used in agreements and by performing both ethically and according to the Company values.

QPR’s market and customer risks are mitigated as follows: the Company conducts business in more than 50 countries, both in public and private sectors as well as in several different business verticals.

Reasonable credit risk concerning individual business partners is characteristic to any international business. QPR seeks to limit this credit risk by continuous monitoring of standard payment terms, receivables and credit limits.

### Risks related to information and products

QPR Software has identified the following three risks related to information and products:

- **Risk related to own products.** The risk is managed by securing the competitiveness of the Company’s offering at all times through content and the product strengths. The company seeks to ensure the security of its products by automated malware prevention.

- **Intellectual Property Rights.** The Company’s Intellectual Property Rights (IPR) are secured by the confidentiality of the source code and selected patent applications. In its new process mining business, the Company has adopted a more active IPR strategy than previously. As a result of this, QPR filed patent applications in respect of five separate inventions in Finland and the USA in 2012. The inventions relate to automated business process discovery based on processing event data. In April 2015, QPR announced that the U.S. Patent and Trademark Office has granted a patent as a result of the applications. In addition, the Company aims to secure by up-to-date contract management and internal training that third-party IPRs are not used unauthorized in QPR products. The Company has a legal expenses insurance.

- **Data security.** Data security risks are related to the confidentiality of corporate, insider and customer information. Risk is managed by ongoing internal training, keeping instructions up-to-date at all times, and by good technical protection of the Company’s data network.

No significant changes have taken place in QPR’s information and product related risks during 2016.

### Risks related to financing

QPR Software has identified the following two financing risks:

- **Currencies.** The instrument used for measuring foreign currency risk is the share of all non-euro receivables of all receivables, or the share of an individual non-euro currency of all receivables (%). The risk is managed by using euro as the primary invoicing currency and by currency hedging in accordance with the Company’s hedging policy. The company constantly monitors the development of open positions of the most important invoicing currencies. At the end of the year, the Company had not hedged its foreign currency (non-euro) trade receivables.

- **Short-term cash flow.** The instrument used for measuring the risk is the forecasted cash flow. Risk is managed by active monitoring of the forecast and by effective collection of overdue receivables.

The risks related to financial position of the company are mitigated by relatively high share of recurring revenue in net sales.
Other information to be provided in the Corporate Governance Statement

Main procedures relating to insider administration

QPR Software Plc’s Insider Guidelines include Nasdaq Helsinki Ltd’s Guidelines for Insiders of Listed Companies (July 3, 2016) and the Market Abuse Regulation (MAR). Both documents are part of QPR’s guidelines unchanged. The QPR Insider Guidelines set trade restrictions prohibiting Persons Discharging Managerial Responsibilities (PDMRs), permanent insiders and event-based insiders from making transactions with QPR’s securities during a closed period of 30 days before a financial report is made public. The closed period ends on the day after the publication of a financial report. According to QPR’s Insider Guidelines, permanent insiders must notify the CEO and the Chairman of the Board about the intention to trade QPR’s securities prior to executing a transaction.

The CEO, members of the Board of Directors and the executive management team are considered PDMRs – this is because they are regularly exposed to inside information and have the right to make decisions regarding the future of QPR. QPR’s permanent insiders include employees or other outsourced persons that due to their position or the nature of their responsibilities have access to inside information.

In case QPR prepares an event that could significantly impact the company’s value (e.g. a corporate acquisition), an event-based insider list must be created for the project. Event-based insiders are persons that contractually work for QPR either directly or indirectly and have access to inside information; as well as any organization that is provided inside information on the project.

QPR’s CFO manages insider issues and supervises compliance with QPR’s Insider Guidelines. The CFO also maintains QPR’s insider register.

Due to the MAR regulation, the information on insider register available at NetSire system is based on the status of July 2, 2016 and it is not updated since then.

QPR Software Plc’s managers and their closely associated persons referred to in the MAR regulation have been requested to notify their transactions as of July 3, 2016.

Audit

The Annual General Meeting elects an auditor approved by the Finnish Central Chamber of Commerce as the company’s auditor. In 2016, Authorized Public Accountant Firm KPMG Oy Ab was elected as the company’s auditor, and declared Kirsi Jantunen, Authorized Public Accountant, as the principal auditor. The auditor’s term expires after the conclusion of the next Annual General Meeting following the election.

In 2016, auditor was paid remuneration for audit services 23,000 euros and for non-audit services 32,324 euros.
