

# ADP Run - import

Run - Import table: <https://www.screencast.com/t/4iV4YCsI94I>

Table is sorted from first imported to last imported.

Below objects are currently mapped with data when import is triggered from ADP to HRC

ADP Run field name	HR Cloud objects
Department	Department
Employees	Employee

Employee object consists of several different fields on employee profile which are getting mapped:

HR Cloud fields on employee profile	ADP RUN field name
First name	First name
Last name	Last name
Start date	Hire date
Date of birth	Birth date
SSN	SSN
Address 1	Address line 1
City	City
