Watch Out For COVID-19

SCREENING ALERT

DO NOT ENTER if you have had possible contact with someone with COVID-19 in the last 14 days or any of the below symptoms of COVID-19 in the last 72 hours.

FEVER COUGH SHORTNESS OF BREATH

HEAD & MUSCLE ACHE FATIGUE SORE THROAT

This is especially important if you have traveled to an area that has had cases of COVID-19 in the last 14 days. If you have had exposure to COVID-19 or have symptoms as stated above, protect your coworkers and yourself. Go home and contact your doctor immediately for further advice.

Product Specification Data

Description

Briteline® MultiGRIP is a 14mil non-slip textured PVC film that is reinforced with fabric on the adhesive side to add extra durability and strength. MultiGRIP can be cut into any shape and can be applied to nearly any surface and removed with little to no residue left behind. MultiGRIP eliminates the need for a UL approved anti-slip laminate for it is ASTM-D2047 certified non-slip film. This film is a perfect solution for tradeshows, POS and retail, universities, outdoor events and anywhere that calls for a graphic that is easy to print, install and remove.

Applications

MultiGRIP is designed for wall and floor graphics, indoor use or short term outdoor use. Surfaces recommended include, but are not limited to; carpet, tile, metal, properly painted surfaces, wood and PVC floors, untreated stone, smooth concrete, asphalt, brick and ceramic tile. (Please see durability expected permanence)

Certifications

E-84 Class A fire rated
ASTM - D2047 non-slip passed

Application Instructions

Remove dirt and debris from the surface the graphic will be applied to; recommended application surface temperature is 50°F. Use a soft rubber roller or squeegee on the surface of the graphic removing any bubbles and making sure the adhesive is making full contact with the surface.

Removal Instructions

Peel back a corner at 45° angle. With even continuous motion, pull back graphic at a 180° angle. If one pulls back at a 90° angle, the chances of adhesive being left behind are more likely.
