Haltermann Carless and Corrigan Oil present test fuel solutions at Automotive Testing Expo 2018

Frankfurt a.M., Germany, September 27 2018 – Haltermann Carless, a leading international supplier of high-value hydrocarbon specialties and solvents and a brand of HCS Group, will exhibit at the Automotive Testing Expo in Novi, Michigan, USA, from October 23-25 2018. Together with their North-American distribution partner Corrigan Oil, the company will present state-of-the-art test fuel solutions for the development of high performing and sustainable automotive engines.

“The close development work with engine and vehicle manufacturers, OEMs and test facilities around the world allow us to jointly work on solutions for a cleaner environment”, says Dr. Jens Schaak, Head of Development Performance Fuels at Haltermann Carless and adds: “Our tailor-made fuels are the ideal choice to fulfil challenging testing concepts and emission legislation requirements.”

The fuels manufacturer develops high-quality specialty fuels, which meet tight specifications, enable high batch to batch reproducibility and offer customers a consistent fuel quality for up to 24 months. In this way, the automotive industry can rely on comparable measurement results during their test programs, such as EPA Tier 3, CARB, RDE, and is in the position to meet the increasingly stringent requirements.

Haltermann Carless is well-known and recognized worldwide for its performance fuels business and the capability to offer customer-defined solutions to global

automotive industries. The fuel specialist offers up to 500 different fuel specifications for all kinds of testing programs.

Haltermann Carless and Corrigan Oil have joined forces in 2016 with the aim to deliver high value to North American customers in terms of products, supply chain solutions, technical support, and bespoke services. Corrigan Oil distributes, stores and blends the highly specialized Haltermann Carless fuels, such as test and reference fuels, legislative and emission fuels, special grades for first-fill or two-stroke engine applications, at their facilities in Michigan.
