JACK TYLER ENGINEERING ACQUIRES NEW WATER SYSTEMS

LITTLE ROCK, AR – Jack Tyler Engineering is pleased to announce the acquisition of New Water Systems, a water and wastewater sales representative firm. With this acquisition, Jack Tyler Engineering will better serve the needs of its customers in municipal, industrial, and commercial operations in Arkansas and the surrounding regions.

Joining the team at Jack Tyler Engineering are Andy Davis, P.E., Charlotte Hayes, James Spann and Calvin Reynolds, all previously of New Water Systems. This merger will increase Jack Tyler Engineering's ability to service customers through the sale of products and equipment never before offered by our firm. Jack Tyler Engineering's pump sales and service team, combined with the treatment process expertise, relationships and vendors acquired from New Water Systems, will create one of the largest water and wastewater representatives and distributors in Arkansas, Northeast Texas, Eastern Oklahoma, Western Tennessee and Northern Mississippi.

Based out of Little Rock, Arkansas, Jack Tyler Engineering provides pumps, air compressors, and process equipment with longer life expectancies and lower life cycle costs. For over 55 years, the family-owned-and-operated business has valued quality, dependability, and excellent customer service above all else. As a factory-certified repair center for more than 25 leading manufacturers, Jack Tyler Engineering has a team of experienced technical engineers and factory-trained service technicians on staff available 24/7/365 for quick and stress-free equipment repair.
