

INTELYGENZ ACADEMY

CUSTOM BUSINESS TRAINING IN A.I

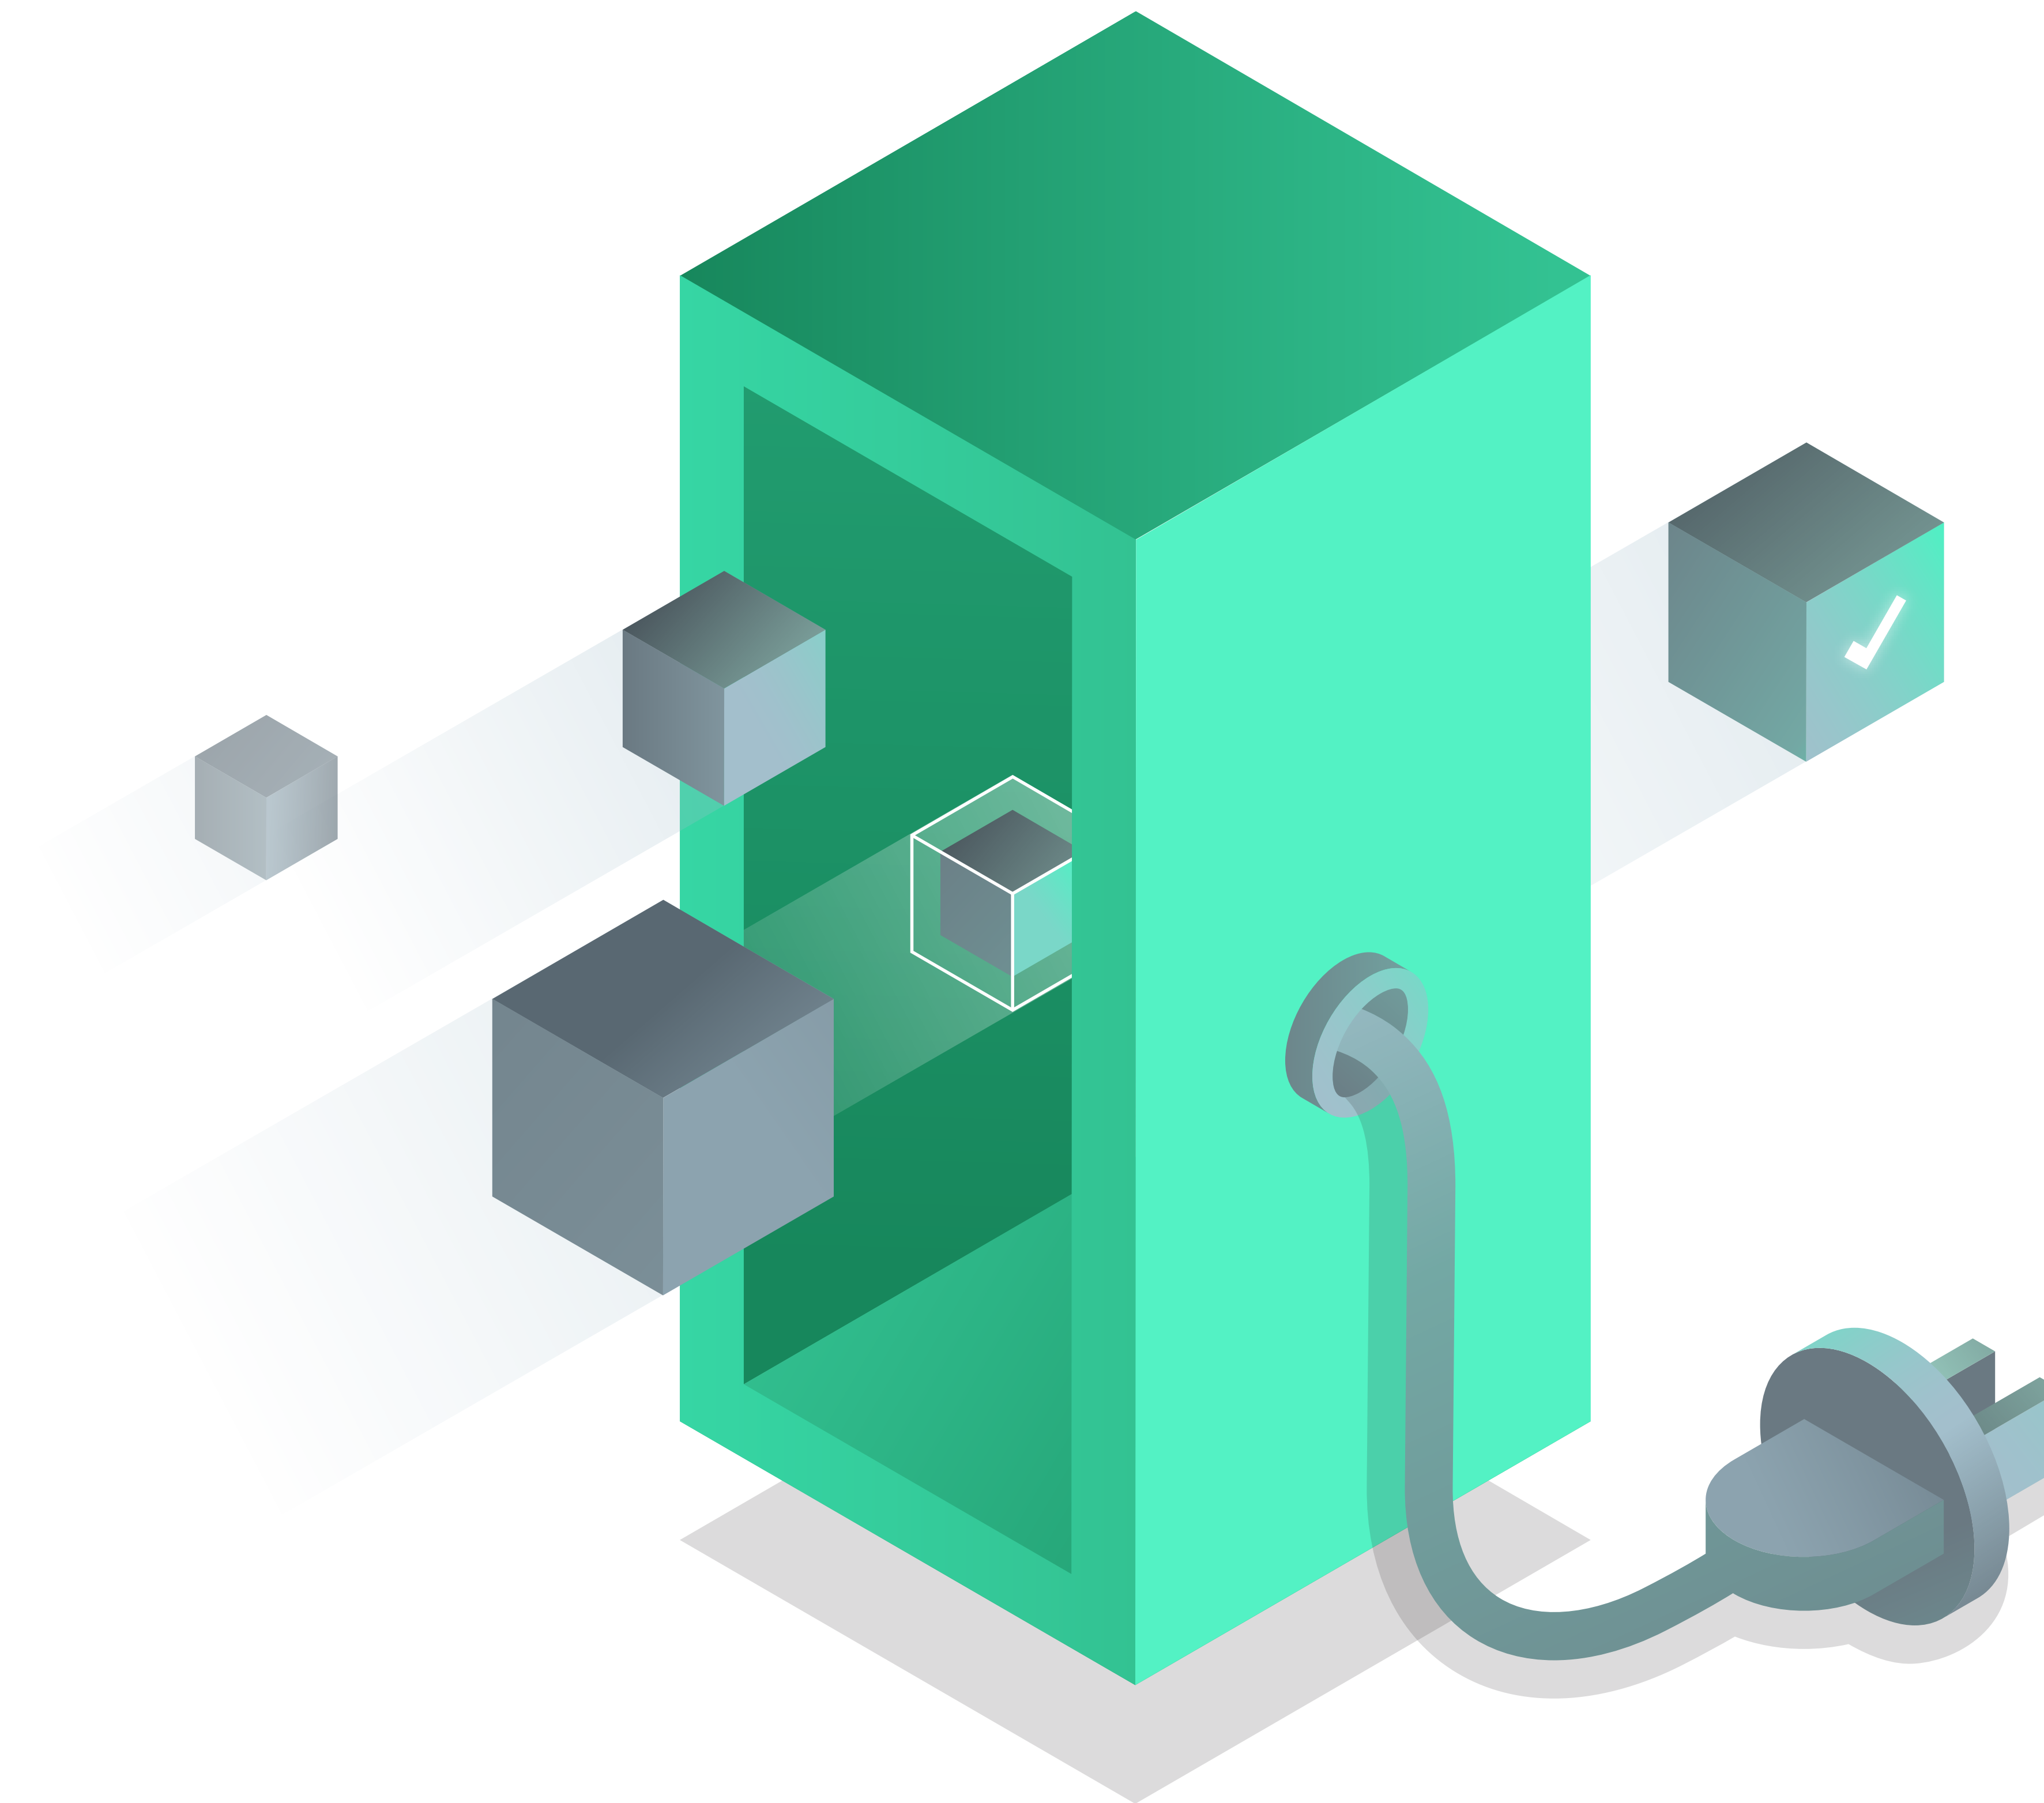

intelygenz.com

INTELYGENZ ACADEMY INVEST IN YOUR SUCCESS

More than 50% of businesses are currently using or integrating AI into their workflows, and the number is growing all the time.

A large part of bringing AI into your business is helping you to understand what it is: what it can do, how it works, and the best areas for its application.

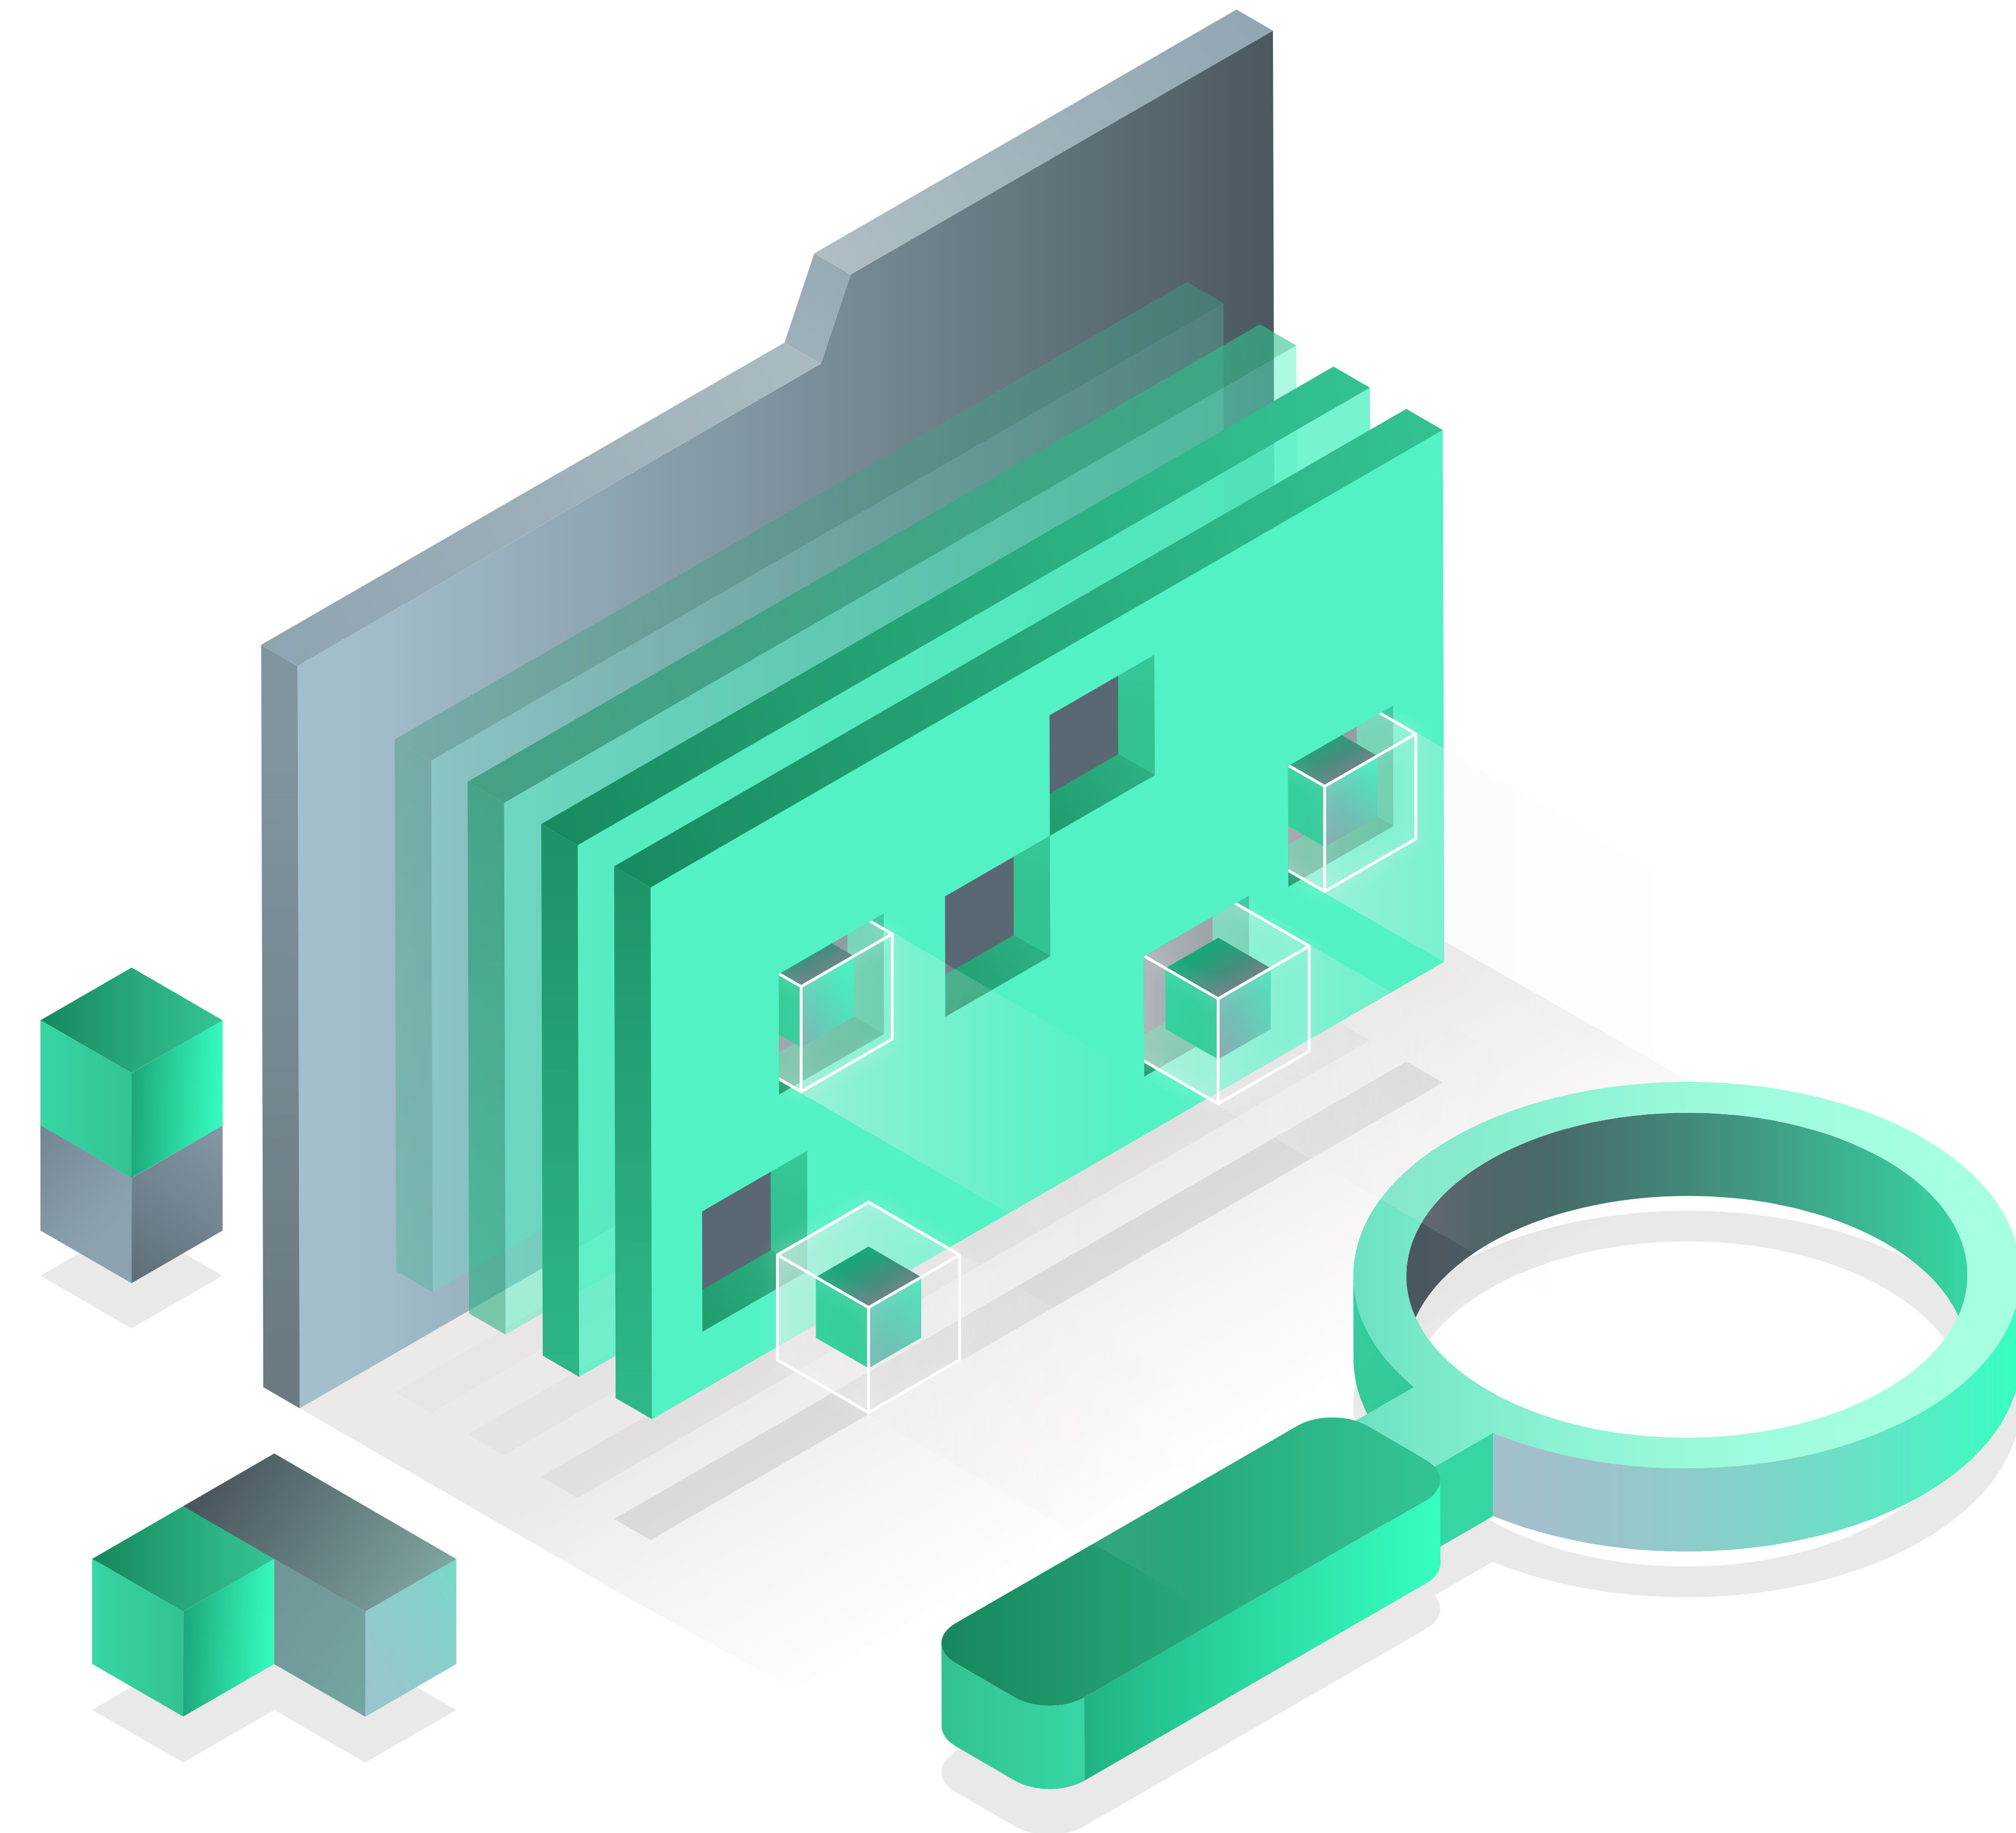

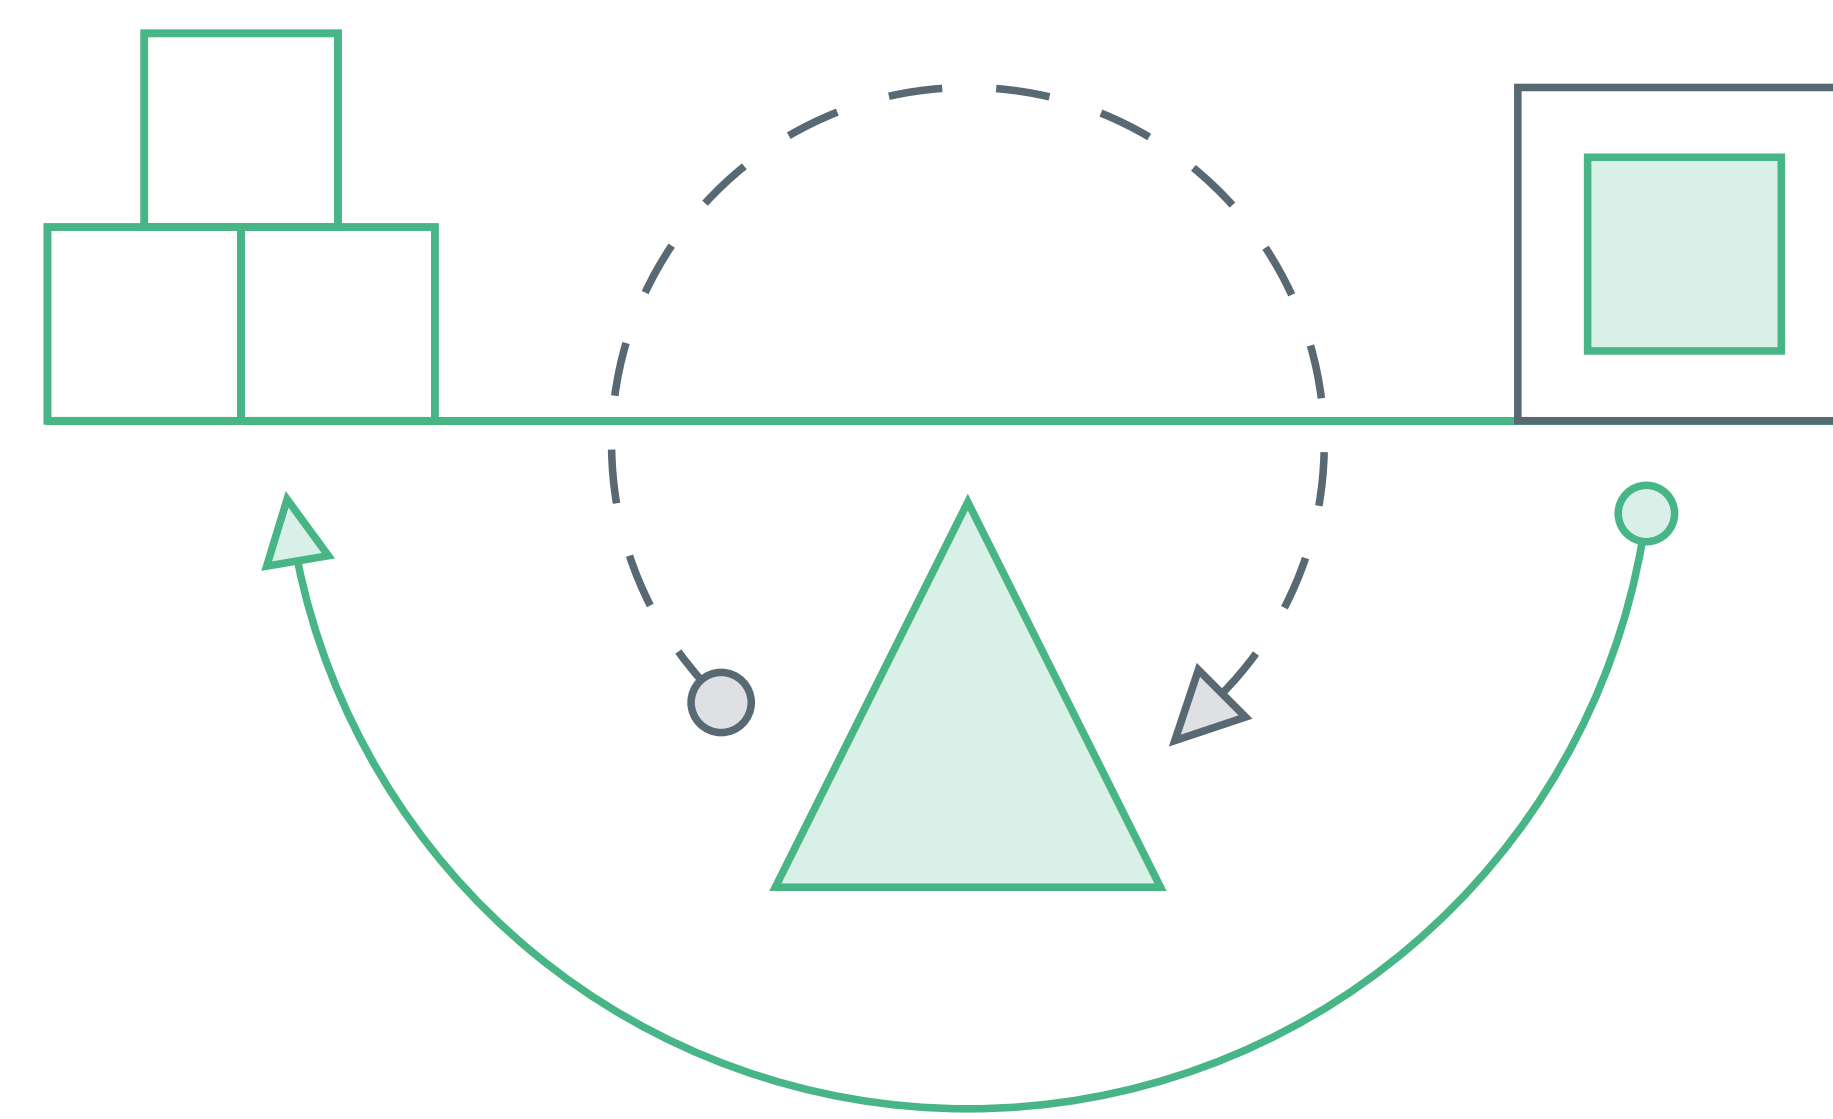

DECIPHER THE BUZZWORDS GAIN THE ADVANTAGE

Artificial Intelligence. Machine Learning. Deep Learning. Data Processing. Natural Language Processing. Neural Networks - what does it all mean, and how can you best use it?

Intelygenz Academy will take you through a three-day training course to increase the knowledge of your technical and non-technical teams on the applications and returns of AI for your business. With the help of highly specialised computer scientists, you'll:

- Discover where your business can benefit from AI through prediction and decision-making.
- Gain basic software coding knowledge to build and test your own AI models on real data sets.
- Complete a practical workshop where you'll build your own AI and compete with colleagues.

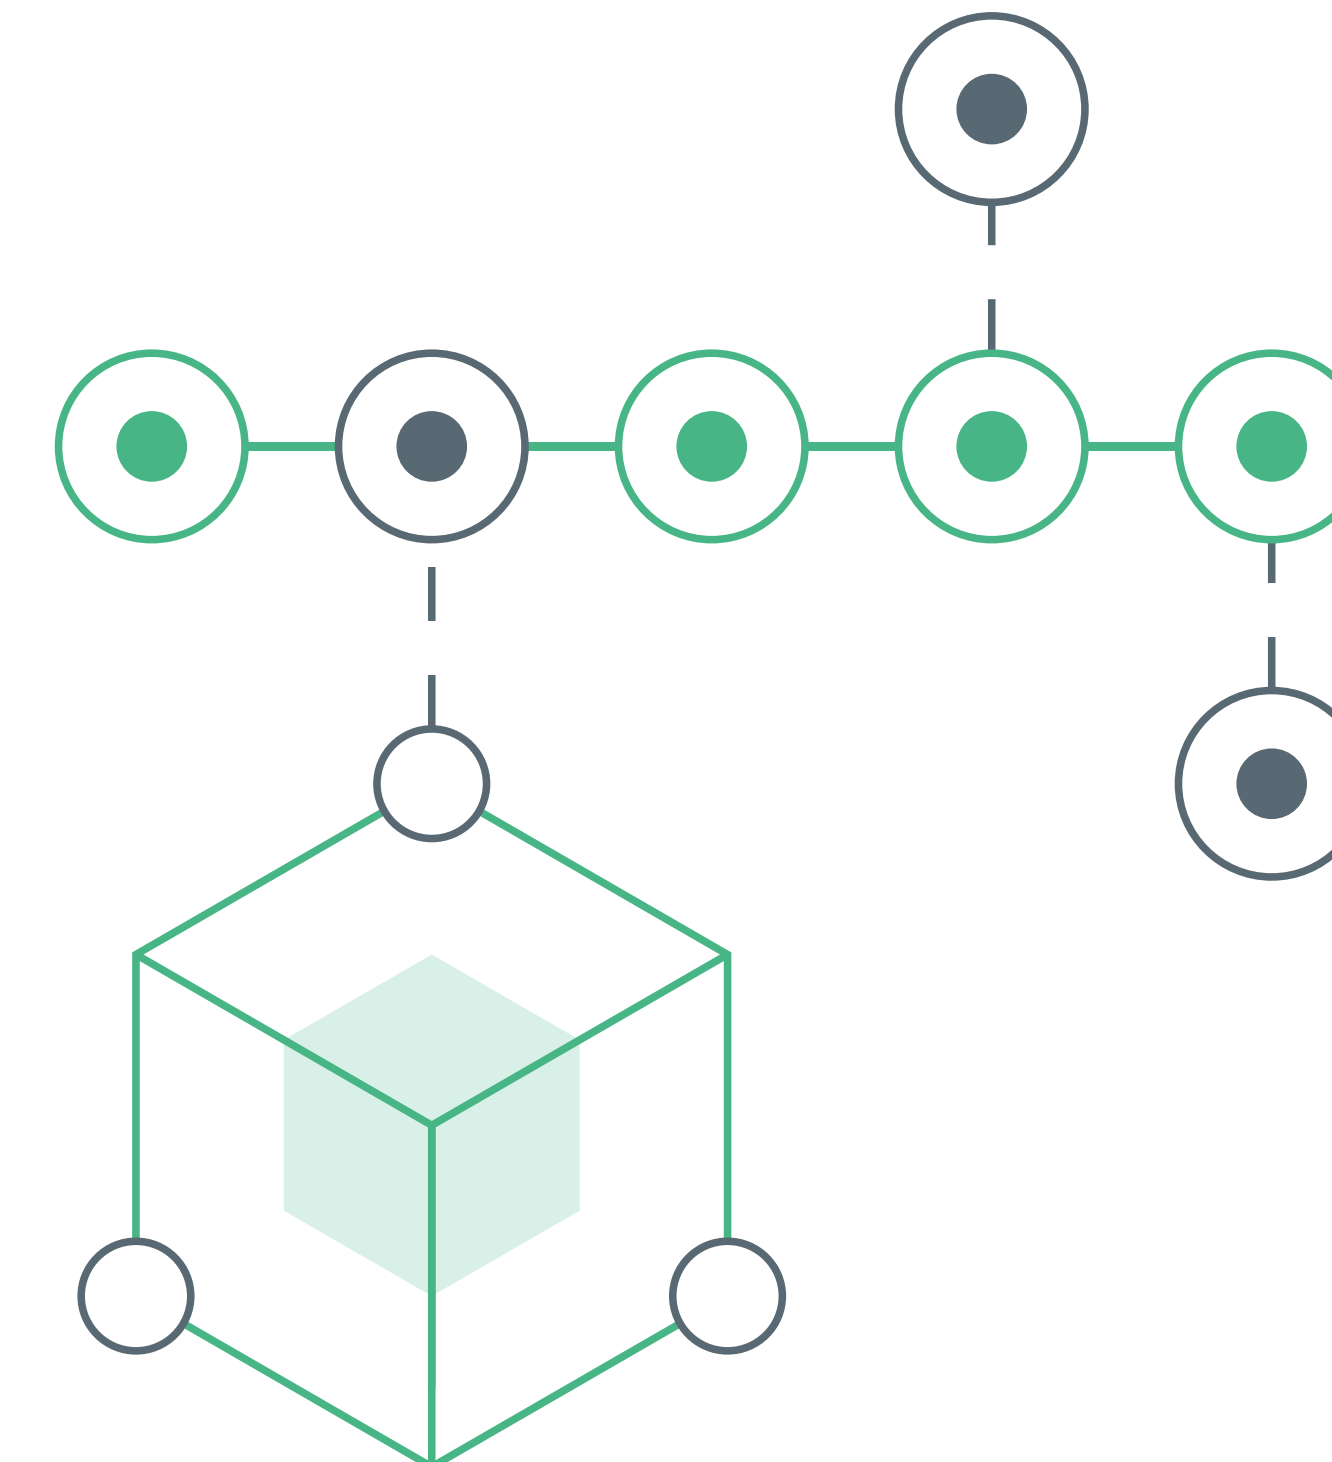

APPLYING AI DAY ONE (4 HOURS)

Technical & non-technical staff
C-level, Product, Operational, Strategy Managers,
Technical Leaders

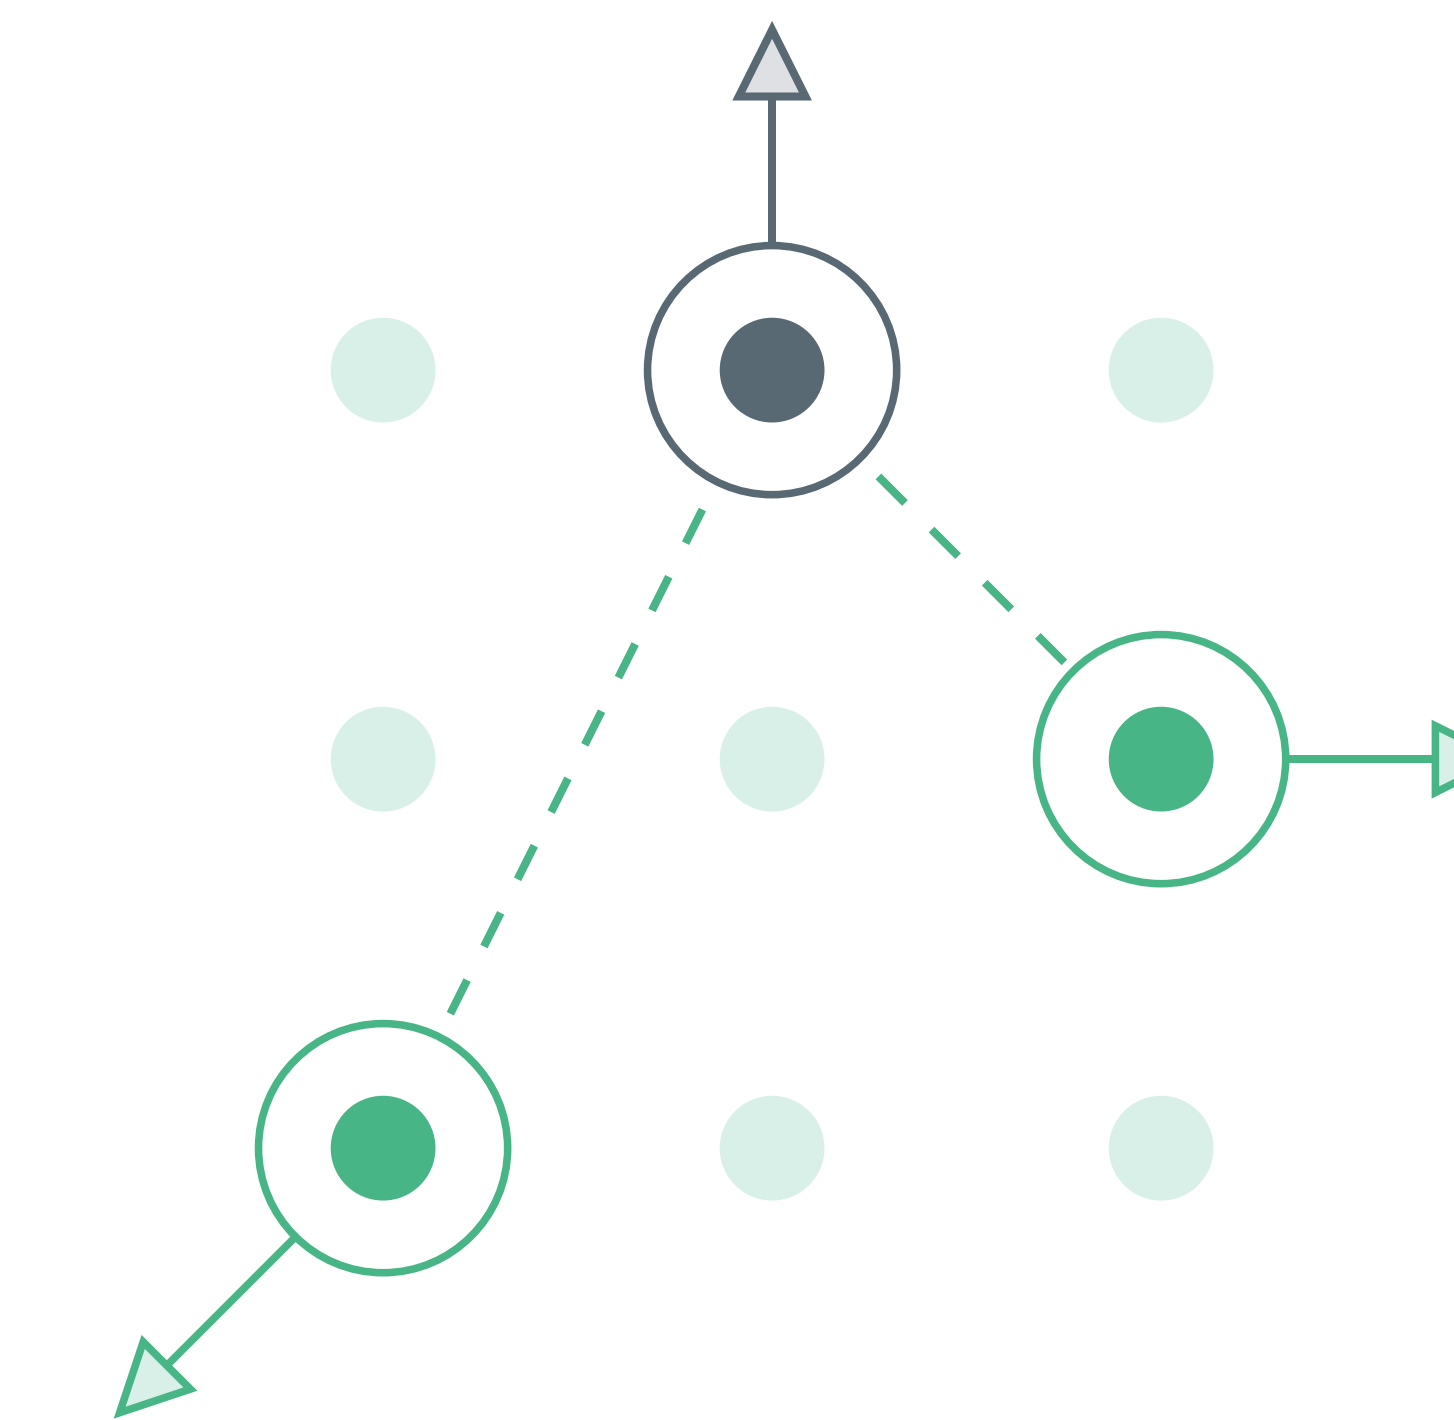

- Understand Artificial Intelligence.
- Find out what AI can really do.
- Discover Neural Network variants & their applications.
- Identify when AI can be used and what makes a good project.

TECHNICAL BASICS OF AI DAY TWO (8 HOURS)

Technical staff with basic coding knowledge
Software Developers, Architects, DevOps

- Get Basic Python training.
- Learn to manipulate data sets.
- Review basic concepts in statistics.
- Apply Neural Network variants & their technical details.

BUILD YOUR OWN AI MODEL DAY THREE (8 HOURS)

Technical staff who have attended Day Two
Software Developers, Architects, DevOps
from Day Two

- Run through the main phases of an AI project.
- Divide your group into teams.
- Develop a practical AI model with company data sets.
- Compete!

CONCLUSION

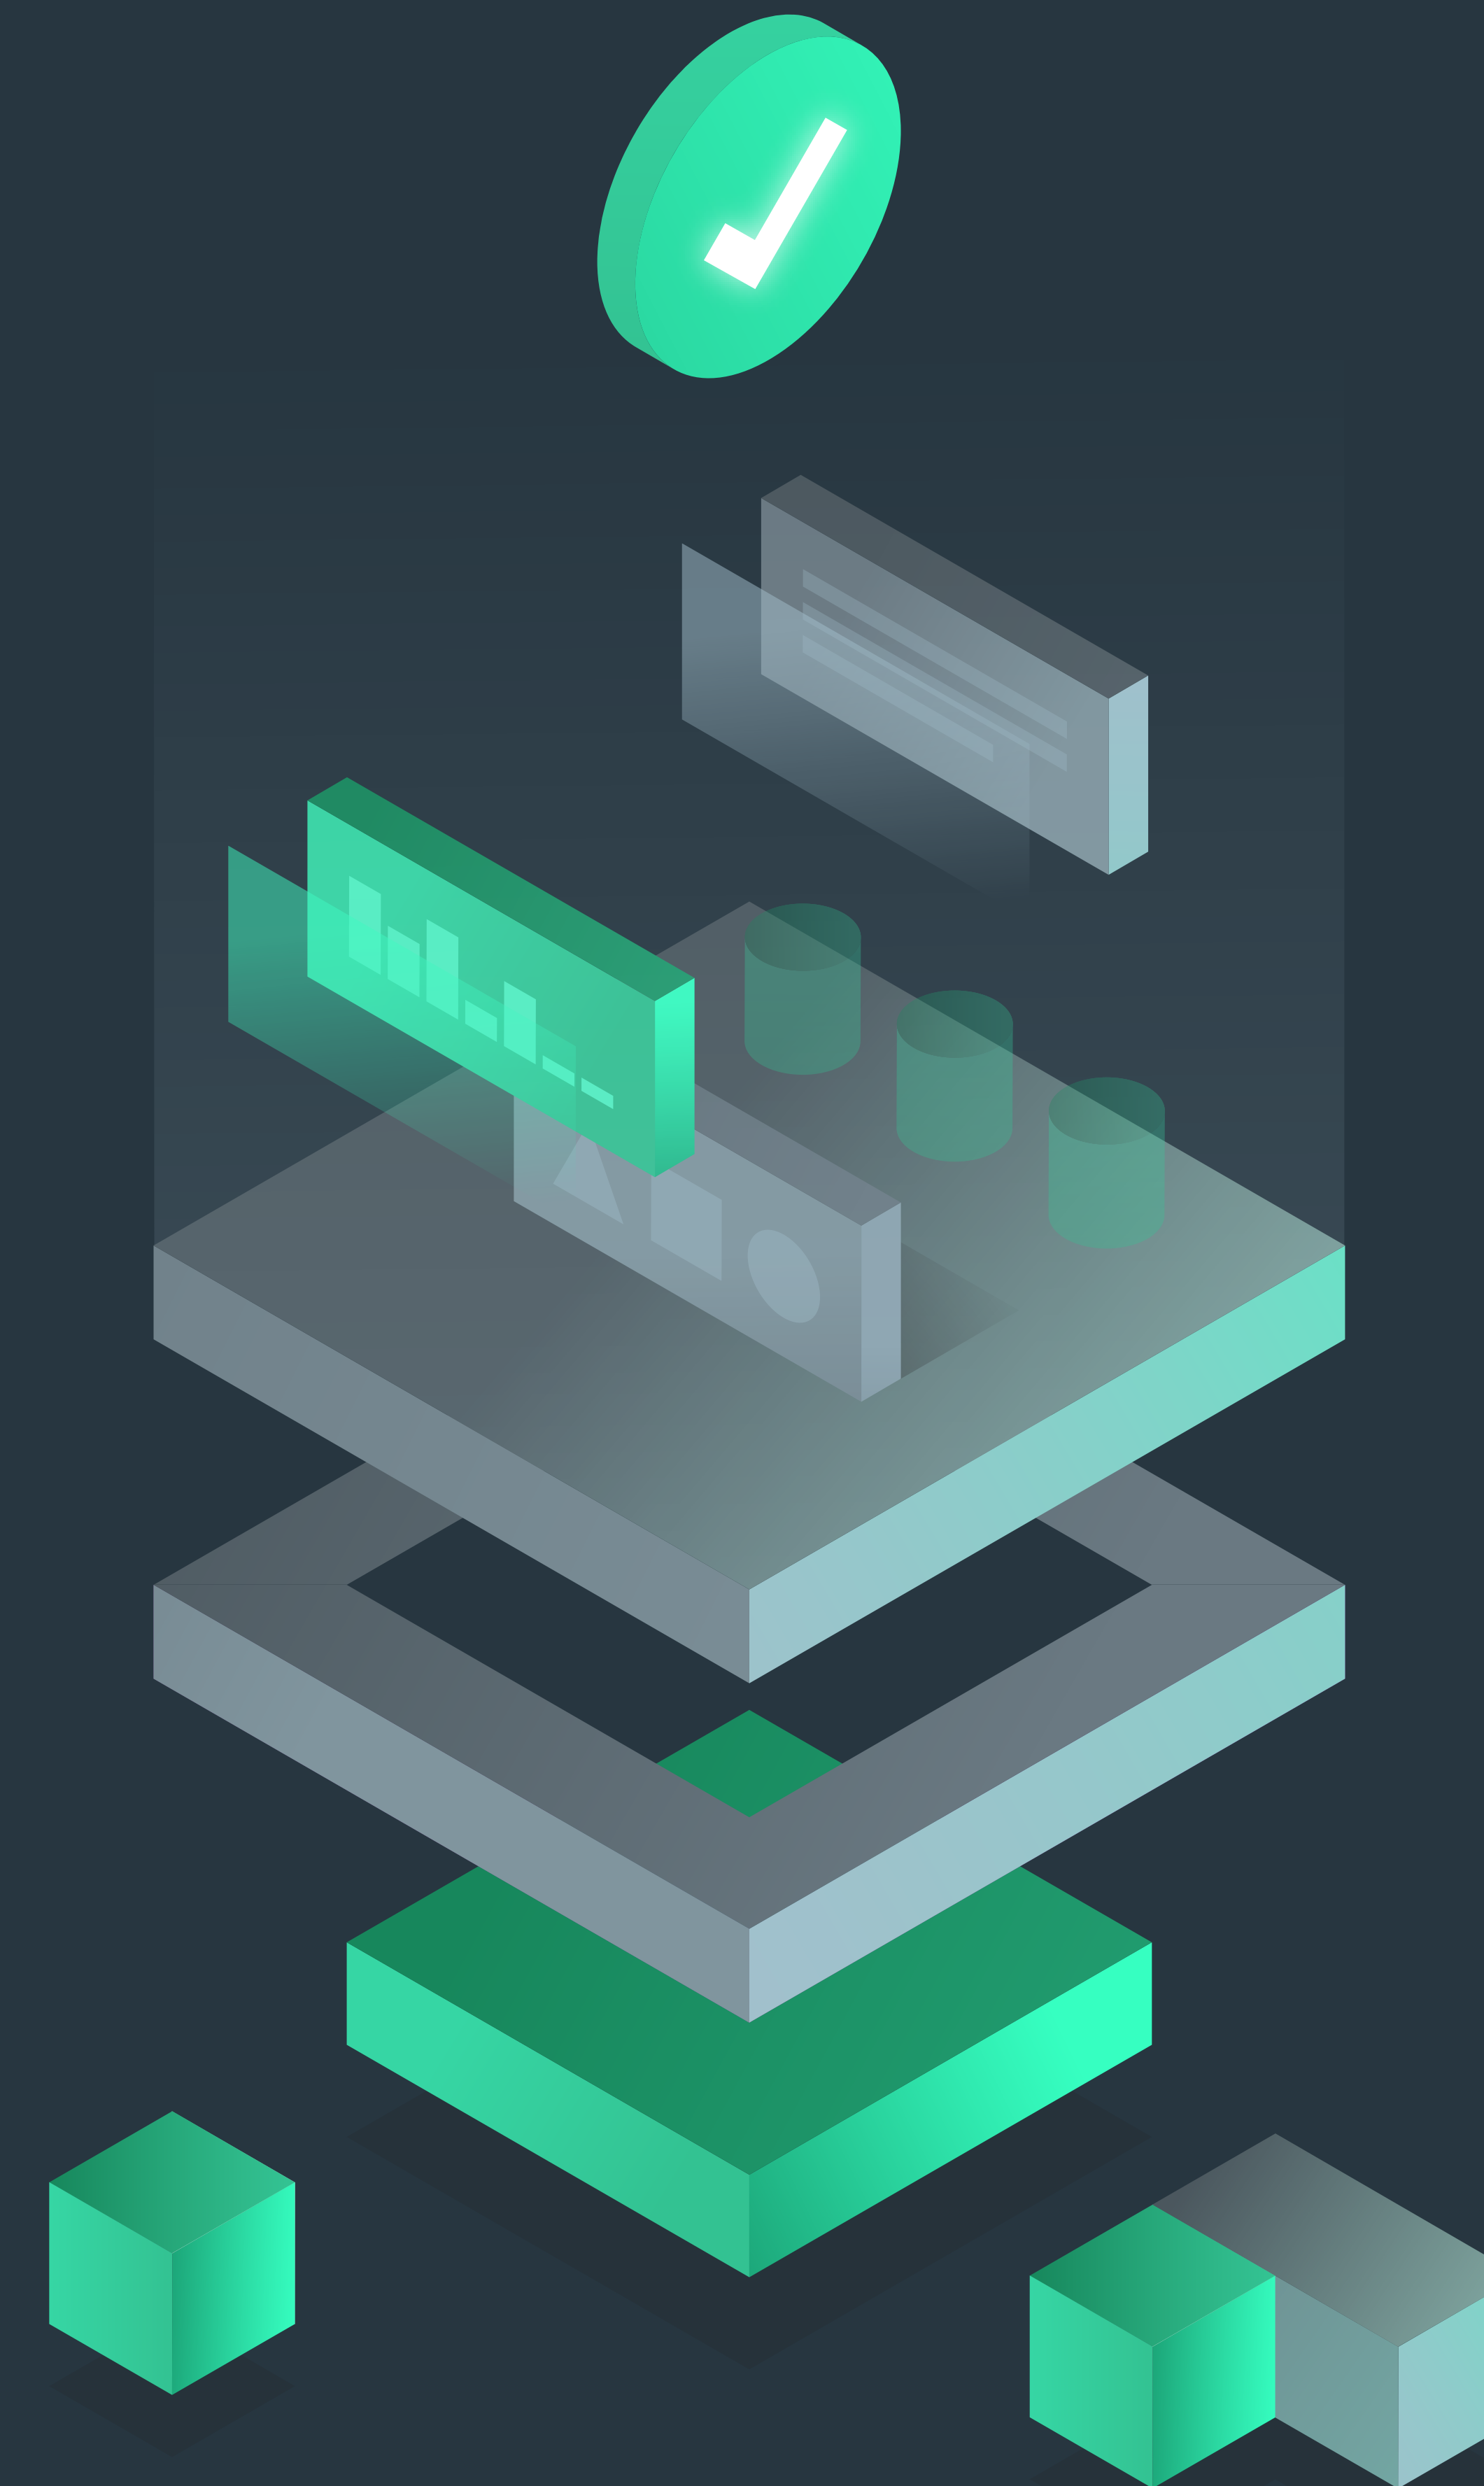

At the conclusion of the Academy, you can expect to have a team with a **deep understanding of the state of today's AI capabilities**. They'll understand where AI can be best applied in your business to give you **an advantage in the market**, be up-to-date on the latest techniques, and able to identify indicators for choosing an AI application **driving significant value for your business**. In addition, your technical team will possess the basic skills to prepare your data and use it to develop and **test real-world AI models**.
