

PHARMACY

System Overview

Quickly deploy wireless sensors and digital checklists for proactive visibility into your pharmacy compliance and operations.

Our System

TempAlert's system is designed to solve your most important pharmacy safety challenges. The system combines wireless sensors with remote monitoring software and a digital checklist. The results are actionable insights that drive quality control, employee productivity, and regulatory compliance.

Wireless Sensors

Connect any fridge or freezer in minutes with TempAlert's wire-free sensors.

Monitoring Platform

Gain proactive insights and remotely monitor equipment to automate paper temperature logging.

Analytics & Reporting

Maintain regulatory compliance with on-demand and scheduled reporting.

TempAlert Difference

Deploys in Minutes

Install in minutes with self-provisioning wire-free sensors. Quickly monitor temperature, humidity, tank, and other sensors.

Enterprise Grade

Store & forward technology for lossless monitoring, 5-year battery life, IP67 rated sensors, and AES encryption and certificates.

Proactive Insights

Gain visibility with predictive models and simulated product temperature that enable proactive decision making.

Compliance Visibility & Efficiency

Meet rigorous CDC, Board of Pharmacy, and VFC compliance standards. Gain visibility into site performance for improved accountability and risk management.

Collaborative Monitoring

Drive efficiency with TempAlert's collaborative system for incident management and cross-team workflows.

Deployment Experience

We partner with our customers to create world leading systems. We have experience deploying 250 sites per day.

Wireless Sensor

TempAlert's wireless sensors offer the world's only 100% wire-free installation and wireless screens for deployment in minutes.

- **100% Wire-Free:** Deploy in minutes with the industry's only sensor that can be placed directly in fridges and freezers - no wires or cords.
- **Long Battery Life:** Easily replaceable AA batteries provide five years of operation without the need to change batteries.
- **Plug & Play Install:** Sensors automatically connect to your TempAlert gateway to provide a self-provisioning installation process. Centralized configuration is provided through our web-based dashboard.

Wireless Screen

TempAlert's wireless screens provide a digital display for wireless sensors placed up to 200 feet away.

- **Actionable Alerts:** Receive both audible and visual notification when sensors are in alarm.
- **High Contrast Display:** High contrast e-ink display provides crystal clear readings.
- **Easy Deployment:** 100% wire-free design and integrated magnets make it easy to bring equipment performance visibility to your front lines.

Supply Chain Sensor

TempAlert's product tracking solution eliminates expensive hardware, provides real-time alerts, and automates temperature verification.

- **GPS Tracking:** Follow your package from start to finish with GPS tracking and real-time temperature readings.
- **Bluetooth Low Energy:** Sensors connect using Bluetooth low energy via an app on the user's smartphone.
- **Multi-Use:** 1-year battery life enables sensors to be used for multiple shipments.

Digital Checklist

TempAlert's digital checklist replaces paper checklists with an intuitive task management system that provides visibility across all your sites.

- **Productivity Platform:** Remotely publish and manage checklists for compliance, operations, receiving, promotions, and more.
- **Integrated Sensors:** Automate equipment monitoring with seamless integration of TempAlert's wireless sensors.
- **Visibility:** Gain real-time insights into checklist compliance and quickly identify at-risk sites for remediation.

Insights™ Dashboard

TempAlert's cloud-based dashboard provides real-time oversight of your safety initiatives and visibility into compliance, site performance, and risks.

Proactive Insights

Make proactive decisions using TempAlert's patented product simulation that provides insight into actual product temperature as well as ambient temperature.

Visibility & Accountability

Gain visibility into your compliance checks and easily measure and compare site performance. Increase accountability with timestamps and signatures.

Automate Reports

Receive automated reports by email to replace paper temperature logs and to identify chronically failing fridges and identify sites that have the greatest risk.

Team-Based Monitoring

Assign incidents to teammates and track corrective action from anywhere with TempAlert's collaborative approach to incident and workflow management.

Manage Workflow

Prioritize By Severity

Assign Ownership

Actionable Context

ABOUT TEMPALERT

Founded in 2005, TempAlert transforms how organizations sense, monitor, and make decisions. Using the Internet of Things (IoT), TempAlert changes the way organizations approach compliance, quality, and efficiency.

TempAlert automates monitoring for pharmacy safety, food safety, product quality, and preventative equipment maintenance. Today, TempAlert has earned the trust of the most critical government, commercial, and non-profit institutions in the world. Our systems enable real-time sensor-driven decisions at over 2,000 organizations in 75 countries.
