

PHARMACY

Monitoring

THE CONNECTED PHARMACY

With multiple regulatory bodies setting compliance standards, making sure you are meeting requirements across all your locations can feel like a daunting task. Especially if you rely on manual monitoring, which at best gives you point-in-time snapshots, leaving you feeling in the dark and unable to manage the safety of your medications and vaccines, or the quality of your food products.

TempAlert's wireless sensors enable you to gain real-time insights into all your pharmacy locations. With our remote monitoring system, you gain actionable insight and automate manual logging to ensure compliance, improve quality, and increase operational efficiency.

Gain Visibility & Actionable Insights

Pharmacy Fridges & Freezers

Food & Beverage Coolers & Freezers

Cold Chain

Ambient Store Conditions

Energy Management

Sensor data is sent to our cloud-based Insights™ platform. Here, you gain operational transparency and prioritize your response in real-time.

MAKE SMARTER DECISIONS

TempAlert puts you in control of your operations and lets you make faster, more knowledgeable decisions about your business. This means better experiences for your customers and improved regulatory compliance for your business.

TempAlert Difference

Actionable Alerts via Email, SMS, and Phone

Industry Leading 5 Year Battery Life

Compliance Visibility and Efficiency

Collaborative Monitoring Platform

Proactive Insights

Deploys in Minutes

COLLABORATIVE INCIDENT MANAGEMENT

Respond to incidents and automate compliance logging with the world's first collaborative remote monitoring system. TempAlert helps multi-site teams manage the workflows associated with temperature excursions, compliance logging, and reporting. From within the monitoring dashboard, team members can schedule automated reports, assign incident ownership, and prioritize alerts based on severity. District and corporate managers can remain up-to-date on active incidents, in real-time.

WIRE-FREE

TempAlert's wire-free solution dramatically reduces installation costs and preserves the warranty of refrigerators and freezers. Our patented wireless sensors deliver a breakthrough in battery life, lasting five years on two AA batteries. Wireless sensors are combined with wireless screens that eliminate running wires through the fridge seal. Monitoring systems deploy in minutes and offer flexible communication through Ethernet or Cellular.

PROACTIVE INSIGHTS

TempAlert enhances your organization's visibility so you can make more informed decisions about product quality and regulatory compliance. Our patented simulation technology enables proactive alerts based on actual product temperature, rather than air temperature, reducing false alarms and helping you take action when product is at risk. TempAlert is built for the most demanding enterprise environments, where security, scalability, and manageability are required for program success.

Wireless Sensors

Plug and play sensors provide real-time monitoring of fridges and freezers.

Monitoring Platform

TempAlert's Insights™ dashboard enables you to remotely monitor your equipment and to take corrective action when needed.

Compliance Reporting

Replace paper logs with automated reporting and centralized compliance visibility.

ABOUT TEMPALERT

Founded in 2005, TempAlert transforms how organizations sense, monitor, and make decisions. Using the Internet of Things (IoT), TempAlert changes the way organizations approach compliance, quality, and efficiency.

TempAlert automates monitoring for food safety, pharmacy safety, product quality, and preventative equipment maintenance. Today, TempAlert has earned the trust of the most critical government, commercial, and non-profit institutions in the world. Our systems enable real-time sensor-driven decisions at over 2,000 organizations in 75 countries.
