Catalytic is the easiest path to break through corporate inertia in procurement & sourcing

Our cloud-based automation platform bridges the gap between people, data and existing technologies, automating routine business processes with up to 100% accuracy, sparking a chain reaction of productivity.

Automate workflows of routine tasks

Your employees are overworked, and you need to get more done, faster. Imagine how an assembly line builds cars, mail merge streamlines bulk mailings, or a calendar updates when an invitation is accepted. Apply these same intelligent functions to your business tasks like document creation and data processing.

Optimize employee efforts

Improve the quality, accuracy and efficiency of end-to-end workflows, made up of common office tasks, while freeing up your employees to focus on the creative and strategic work that meaningfully impacts your business and increases competitive edge.

Reduce errors and missteps

Manually aligning departments and existing technologies in your organization can cause mistakes, missteps and failed handoffs. Catalytic streamlines communication across your entire company and its external networks, with web forms, text extraction, Natural Language Processing and email triage.

Maintain lower costs

Traditionally, better results require increased investment in your workforce and systems. Catalytic enables you to keep your bottom line low while delivering on client demands. You can do more, faster, with the resources you have, and realize ROI quickly.

AI and machine learning

The more data processed, the smarter the platform becomes, and the more efficient your organization becomes.

Cloud-based

We require a much smaller upfront cost compared to on-prem software. Our platform essentially pays for itself.

An embedded ecosystem

Built-in features from our third-party partner ecosystem augment our slate of business process automations.

Analytics

Data gleaned from our automations helps you identify strengths and weaknesses in your business, and how you can improve.

Enterprise-grade security

Our automation platform is simple, safe and secure. We're SOC 2 Type 2- and HIPAA-compliant.

"50% of North American and 35% of European companies with more than $2B in annual revenue have automated processes like e-requisitions, catalog management, and accounts payable invoicing," according to Gartner.

Automation for procurement and sourcing

Procurement teams are continuously faced with containing cost, reducing risk, and achieving better results with suppliers, all while managing a complex sea of purchases and vendors with an insufficient or unoptimized headcount. Catalytic can help you manage all the tedious processes of the procure-to-pay cycle.

Auto-generate contracts and reports

Automatically generate standard contracts and agreements with suppliers and other third parties. Catalytic can pull supplier information into existing templates and send for review and electronic signature. Our platform helps you track the entire process end-to-end, unburdening your teams of manual tasks and reducing error.

Automate compliance review

By using natural language processing to scan for terms and exceptions, procurement teams can reduce the unknown risks hidden within hundreds or thousands of active contracts. Catalytic can track compliance, certification and insurance issues and automatically notify vendors to correct them.

Improve supplier data quality

Essential data is often stored in multiple locations, in differing formats, and with missing or outdated information. Catalytic can automate master supplier data management by taking unstructured information, integrating it with your systems of record, and automatically updating it for clean, consolidated records that save time and lower risk.

Vendor performance analysis

With Catalytic, you can automate vendor feedback to understand metrics like quality of products, quality of service, results versus contract metrics, and value versus cost. This can be analyzed alongside other data such as fees, usage, uptime, and on-time delivery to provide a holistic view of vendor performance.

Standardize purchasing

Automate tedious work, like shuttling data into systems, creating documents and spreadsheets, collecting e-signatures, and scheduling meetings.

Optimize your network

Empower your team to make informed decisions based on data and analysis, so they're free to focus on strengthening your supplier network instead of time-consuming manual and tactical work.

Streamline operations

Remove bottlenecks and shorten the procurement process cycle while increasing accuracy so you can focus on producing the innovations that drive your business.

Strategize better

Make better-informed decisions by gathering accurate data and metrics for spend analysis, quality assurance, benchmarking, and market research.
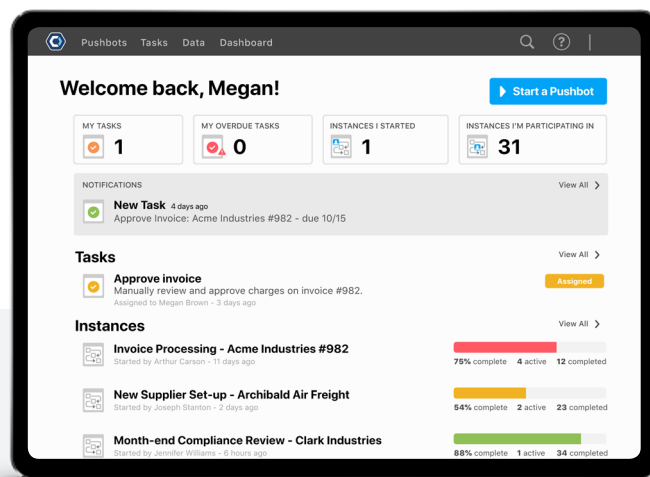

Customer success story

1,500 days of manual work saved annually

In one year, global manufacturing company **Bosch** saved more than 1,500 days of manual effort while reducing human error by automating supplier contract compliance with Catalytic. **Learn more >**
