

Catalytic is the easiest path to break through corporate inertia

Our cloud-based automation platform bridges the gap between people, data and existing technologies, automating routine business processes with up to 100% accuracy, sparking a chain reaction of productivity for your business.

Automate workflows of routine tasks

Your employees are overworked, and you need to get more done, faster. Imagine how an assembly line builds cars, mail merge streamlines bulk mailings, or a calendar updates when an invitation is accepted. Apply these same intelligent functions to your business tasks like document creation and data processing.

Reduce errors and missteps

Manually aligning departments and existing technologies in your organization can cause mistakes, missteps and failed handoffs. Catalytic streamlines communication across your entire company and its external networks, with web forms, text extraction, Natural Language Processing and email triage.

Optimize employee efforts

Improve the quality, accuracy and efficiency of end-to-end workflows, made up of common office tasks, while freeing up your employees to focus on the creative and strategic work that meaningfully impacts your business and increases competitive edge.

Maintain lower costs

Traditionally, better results require increased investment in your workforce and systems. Catalytic enables you to keep your bottom line low while delivering on client demands. You can do more, faster, with the resources you have, and realize ROI quickly.

AI and machine learning

The more data processed, the smarter the platform becomes, and the more efficient your organization becomes.

Cloud-based

We require a much smaller upfront cost compared to on-prem software. Our platform essentially pays for itself.

An embedded ecosystem

Built-in features from our third-party partner ecosystem augment our slate of business process automations.

Analytics

Data gleaned from our automations helps you identify strengths and weaknesses in your business, and how you can improve.

Enterprise-grade security

Our automation platform is simple, safe and secure. We're SOC 2 Type 2- and HIPAA-compliant.

Customer case study

A major advertising agency used Catalytic to introduce automation to the tedious media actualization process. Automating this process with Catalytic's integration capabilities gave back a significant amount of time to stakeholders so they could reallocate their time to creating even more value for their clients.

“Catalytic is a trustworthy partner, providing significant ROI, with a vision to scale by making the technology accessible to non-technical audiences. That means we can easily deploy automation throughout the organization, resulting in massive productivity gains, cost reduction and higher quality and reliability of data.”

Max Cheprasov
Chief Automation Officer,
Dentsu Aegis Network

Regardless of industry, role or technical proficiency, your business users can create new process workflows using hundreds of available actions, integrations and data tools, without having to rely on IT. Our platform handles the manual workload, while keeping humans in the loop.
