

Catalytic is the easiest path to break through corporate inertia for finance & accounting

Our cloud-based automation platform bridges the gap between people, data and existing technologies, automating routine business processes with up to 100% accuracy, sparking a chain reaction of productivity.

Automate workflows of routine tasks

Your employees are overworked, and you need to get more done, faster. Imagine how an assembly line builds cars, mail merge streamlines bulk mailings, or a calendar updates when an invitation is accepted. Apply these same intelligent functions to your business tasks like document creation and data processing.

Reduce errors and missteps

Manually aligning departments and existing technologies in your organization can cause mistakes, missteps and failed handoffs. Catalytic streamlines communication across your entire company and its external networks, with web forms, text extraction, Natural Language Processing and email triage.

Optimize employee efforts

Improve the quality, accuracy and efficiency of end-to-end workflows, made up of common office tasks, while freeing up your employees to focus on the creative and strategic work that meaningfully impacts your business and increases competitive edge.

Maintain lower costs

Traditionally, better results require increased investment in your workforce and systems. Catalytic enables you to keep your bottom line low while delivering on client demands. You can do more, faster, with the resources you have, and realize ROI quickly.

AI and machine learning

The more data processed, the smarter the platform becomes, and the more efficient your organization becomes.

Cloud-based

We require a much smaller upfront cost compared to on-prem software. Our platform essentially pays for itself.

An embedded ecosystem

Built-in features from our third-party partner ecosystem augment our slate of business process automations.

Analytics

Data gleaned from our automations helps you identify strengths and weaknesses in your business, and how you can improve.

Enterprise-grade security

Our automation platform is simple, safe and secure. We're SOC 2 Type 2- and HIPAA-compliant.

“Automation can streamline up to 40% of the transactional accounting work the finance department does today,” according to Accenture.

Automation for finance and accounting

Maintaining an accurate picture of financial health is critical to your business, but your finance and accounting work is often made up of disparate processes and data sources, leaving your work overwhelming and error-prone. With automation, you can streamline for efficiency and accuracy, and make finance a more strategic part of your organization.

Report processing

Problem

At most organizations, creating financial reports involves running multiple large Excel files simultaneously, creating stalls, errors and long execution times.

Solution

By automating the process with Catalytic, businesses can combine data from disparate files and systems, reduce time-to-completion by 50% or more, and ensure the process runs smoothly and accurately.

Invoice automation

Problem

The invoice process typically involves multiple stakeholders, requires time-consuming communication, and is often slowed down further by discrepancy resolution.

Solution

Catalytic can intake invoices from vendors and suppliers, parsing out information and identifying relevant fields. If there are concerns, the right employee can receive a notification to review or approve, then our platform can push the relevant data to your payment system.

Decrease bottlenecks

Problem

Closing out each month, quarter and year can cause your team to be overworked and overwhelmed as deadlines draw near.

Solution

Catalytic can help spread out your workload evenly, streamline close processes and year-end reconciliation, minimize errors and failed controls, and lighten the load for your team during stress-heavy days for quick approvals.

Data Integrity

Problem

Managing a consistent influx of data entered across multiple systems, on top of evolving policies and compliance regulations, makes it hard to maintain accurate information.

Solution

When data, files and forms are automated, and your systems are communicating in a meaningful and trackable way, manual errors are eliminated, and your team can ensure you're working from the most up-to-date information.

Optimize analysts

Automation reallocates your team's time away from manual processes to be a more strategic asset for your organization.

Stay compliant

Automating ongoing compliance enforcement allows your team to proactively address new regulations before they impact your business.

Foreign currency conversion

Automatically reconcile credit and debit transactions that occur in currencies other than USD, identify the exchange rate, and provide tracking.

Customer success story:

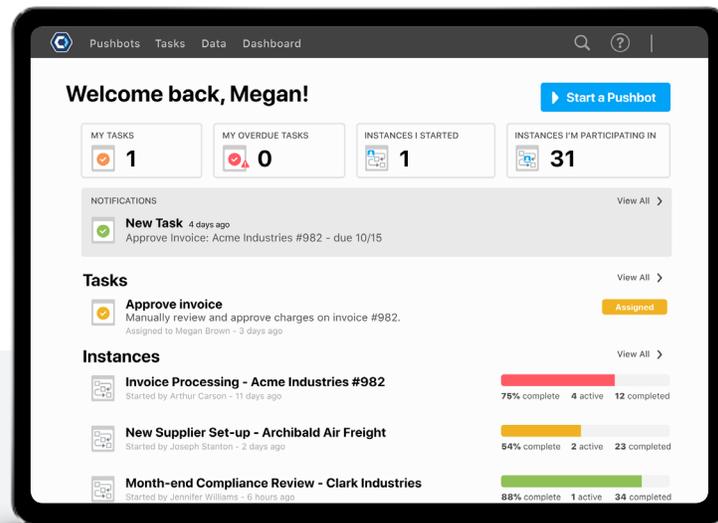

\$125K saved with automated invoice process

Catalytic helped one global certification company design a new invoice intake process that automated the vast majority of its manual work, driving an immediate \$125,000 in cost savings.

90%
OF MANUAL WORK
AUTOMATED

AUTOMATION SCALED ACROSS
30
SYSTEMS

1,500
HOURS IN ANNUAL
TIME SAVINGS EXPECTED

Your team can create new process workflows using hundreds of available actions, integrations and data tools, without having to rely on IT. Our platform handles the manual workload, while keeping humans in the loop.

**Many Catalytic customers see up to 400% ROI.
