

Pre-Selecting Lessons to Maximize Learning Time

From your Teacher Dashboard's Assignment tab (A below) you are able create Lesson and Targeted 10 assignments and review data connected to all previous assignments. Both of these lesson types can be created from the "Assignments" page (A) of your Teacher Dashboard.

To kick off your trial, we recommend first starting with Lesson Assignments.

The screenshot shows the Knowre Math Teacher Dashboard for a class named "4th Grade (Period 1)". The "Assignments" tab is highlighted with a green box and labeled "A". A "New Assignment" button is also highlighted with a green box and labeled "B", with a dropdown menu showing options for "Lesson Assignment" and "Targeted 10 Assignment". Below the navigation, there is a table of assignments:

Due	Type	Assignment	Completed	KSS	Achvmt
Jan 12	Lesson	5-3, 5-4	0 / 1		
Oct 31, 2019	Lesson	2-2, 2-3	0 / 1		

Benefits of Assigning Lessons:

- **Time Bound Data:** do you need to know how many of your students completed an assignment during a specific time frame? All data in the Lesson Assignments tab freezes at the selected due date/time. Students can continue working on any lesson outside of this window, but by assigning the lesson(s), you will have a snapshot of what was completed in the allotted time.
- **Student Time Management:** assignments help students manage their time by displaying clear due dates which reflect what they should be able to complete by when. We recommend spreading out due dates by creating assignments of no more than 2 lessons each.
- **Set It and Forget It:** by using the Lesson Assignment feature, you can assign all of the lessons for a unit, with different due dates, in a matter of minutes. Once assigned, students will have a clear sense of what they need to accomplish each Knowre Math session, allowing you to focus elsewhere.
- **Differentiation:** pre-setting assignments makes it more manageable to have different students working on different content at the same time.

How To: Lesson Assignments

There are two steps to creating a Lesson assignment:

Step 1: Select 1 or more lessons to assign

Step 2: Select the students who should receive the assignment and it's due date/time.

Step 1:
Select 1 or more lessons to assign

Step 2:
Select the students who should receive the assignment and it's due date/time
