### Business Challenge

Emerging GDPR requirements combined with an increasing number of customers looking to modernize and migrate their SAP environments, are forcing many companies to evaluate their access controls and segregation of duties to ensure they are fully compliant and audit-ready. To support this critical customer need, Harmonie Technologie needed an infrastructure platform to support the SAP environment used to develop and deliver software and services to their end clients. Maximizing their time to market was a key component in selecting the right mix of infrastructure and software components.

### Solution

Harmonie Technologie partnered with Symmetry for its' combination of leading SAP GRC software capabilities in ControlPanel<sup>GRC</sup>, and expertise in managed cloud infrastructure using the AWS public cloud platform. Symmetry was able to support Harmonie Technologie's aggressive project timelines by leveraging AWS cloud services to deploy the Symmetry ControlPanel<sup>GRC</sup> solution in a pure software as a service model.

By partnering with Symmetry, Harmonie Technologie can offer a complete GRC solution to cover operational risks related to data management in its customers' SAP systems.

– Mehdi Kefi  
GRC Practice Senior Manager, Harmonie Technologie
