### Business Challenge

Privacy laws like GDPR are redefining digital business. As an SAP Services Partner providing certified SAP consulting services to businesses around the world, Sage Solutions Consulting required a complete solution to successfully secure and manage client SAP landscapes. To support this critical need, Sage Solutions Consulting began investigating an infrastructure platform to support the SAP environment that could be used to both develop and deliver software and services to their end clients.

### Solution

Sage Solutions Consulting enlisted Symmetry's leading SAP GRC software, ControlPanel<sup>GRC</sup>, and their expertise managing cloud infrastructure using the AWS public cloud platform. Internal consultants can now access a robust GRC platform via the AWS cloud for client demonstrations, compliance and audit-relevant tasks, while dramatically reducing time and associated costs.

*By partnering with Symmetry, Sage Solutions Consulting can offer comprehensive, purpose-built security and compliance solutions to a growing number of enterprise customers.*

*– Hugh Jetha  
CEO, Sage Solutions Consulting*
