Medidata Solutions Has a Vision to Lead, In Patient Care and Sustainability.

Story: A company with a passion and entrepreneurial spirit for transforming clinical development on a global scale cares about innovation beyond products and services. At Medidata, innovation is embedded in who they are and how they operate. When it comes to social responsibility, their vision is to be a leader, focusing on three main goals: Access to treatment for all patients, STEM education, and Gender equality.

Challenge: Medidata runs a lean Corporate Social Responsibility team, having only one person on staff. In addition to their three overarching goals (Access to all, STEM education and Gender equality), they set out to submit both a CDP and GRI report annually. With only one resource to compile, manage and report information, they were looking for support to decrease the amount of time spent on this exercise while still ensuring quality.

Solution

Measurabl's data automation, central management console, data quality alerts and response check saved Medidata a week's worth of time doing manual calculations and data entry for CDP. Medidata was also able to complete the GRI report, start to finish, in less than two months!

Measurabl - measuring what matters, so Medidata can focus on improving what matters.

"

I couldn't have asked for a better team to help facilitate this process and alleviate some of the very time consuming processes that you are faced with during the reporting process.

–Lyndsay Harris
Global Corporate Social Responsibility Lead
