

Digital career exploration

We've created comprehensive careers software for students, schools and parents to support students towards more rewarding futures.

My Careers is an inclusive software platform that engages and empowers all young people to navigate their journeys from school to a productive, thriving adulthood, and for career advisors to deliver comprehensive, agile and purposeful guidance.

Career exploration that's more accessible

Over 300 information sources helping students navigate their own futures, in one platform.

Deeper career pathway guidance through data-driven insights

Personality, interest and skills information mapped in one central platform to better inform career advice and gain a whole-person picture of each student.

Uncover school-wide data insights

Comprehensive data helps schools to adapt to students needs, refine curriculum and implement a truly student-directed learning environment.

Always up to date

Using the combined knowledge of our researchers, educators, psychometricians and technologists we continuously update our software to provide the latest data to our users.

Features:

- Whole-Person Exploration  
- Student Directed UI/UX 
- Student, School & Parent Dashboard  
- Career Analytics and Comprehensive Reporting  
- Video Integration (Zoom, Microsoft Teams, Blackboard Collaborate)
