TWG
a DOVER company

REAL-TIME VIDEO MONITORING
OPERATOR EFFICIENCY ENABLEMENT

LEADING THE MARKET IN INDUSTRIAL VIDEO MONITORING INNOVATION

Greer, the global industry leader of real-time mobile industrial video monitoring. Greer's video monitoring system can be set up to provide a 360-degree view that continuously monitors the job site and provides vital data, crane operators need to maximize efficiency and safety awareness. State of the art technology provides integrated video output paired seamlessly with Greer LMI or can be offered as a stand-alone option. Greer's multi-camera solution increases operator productivity, optimizes machine output, and enhanced crane operation safety. Greer's rugged display and cameras are engineered for predictable performance, no matter what the weather conditions.

HIGHLIGHTS

- Avoids the need for costly bolt-on displays maximizing cab space.
- Easy operator installation.
- Immediate uptime no training required.
- Easily embedded into Greer's LMI touch screen.
- Greer's Intuitive integrated interface increases crane productivity.
- Multiple display options available in touch screen.
- 360-degree view to ensure safe operations.
