We have tested and configured all our IP devices to make sure they work perfectly with BT Cloud Voice. So to make sure your customer experiences the quality of calls they'd expect, only IP devices from the BT Cloud Voice portfolio can be used. Our IP handsets require power - they can be powered through connection to Power Over Ethernet ports (on a LAN or Hub), or by connecting to a power socket by ordering power supply units with IP handsets.

*The VVX300, VVX400 and VVX500 will remain available for new supply for a short period but will be withdrawn as stock reduces. These phones will also see a price increase to match the pricing of the VVX301, VVX411 and VVX601 respectively.
