

A Fully Integrated Risk Management Solution

At RCM&D, we understand that educational institutions are faced with unique risks and challenges. Enterprise Risk Management (ERM) is a decision-making process for colleges and universities to identify and manage uncertainty. The ERM process allows you to recognize, analyze and manage enterprise risks, in addition to anticipating imminent risks. While traditional risk management programs focus solely on preserving assets, our ERM solution focuses on creating value and optimizing risk opportunities as well.

Improving Oversight and Fostering Collaboration

There are many benefits to implementing and maintaining an ERM program at your college or university. A strong, well-developed ERM process will help you to:

- Anticipate, predict and mitigate the impact of adverse events;
- Capitalize on opportunities while weighing risks versus benefits;
- Improve compliance oversight;
- Foster culture and collaboration between institutional divisions; and
- Enhance governance by allowing for more informed decision-making.

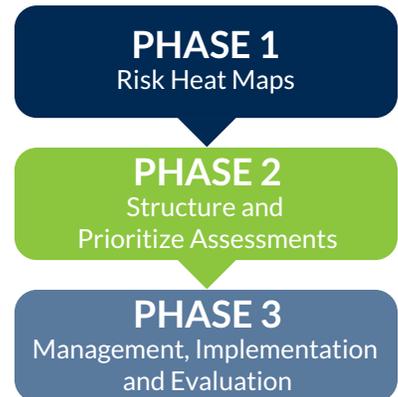

Addressing the Full Spectrum of Risks

RCM&D's ERM solution fully integrates risk management across your entire institution by focusing on your school's structure, values and perceptions of risk. Our expert consultants perform in-depth analyses to address the full spectrum of risks for your enterprise whether **Strategic, Reputational, Technology, Compliance, Operational or Financial**.

A Fully Integrated Approach

Our foundational understanding and research allows us to create custom tailored assessments based on your institution's unique reporting structures. Using the risk management process as a road map, each phase of our engagement builds upon the previous phase until the full cyclical ERM process is achieved. Leveraging our extensive experience managing enterprise risks across complex institutions, RCM&D's fully integrated ERM approach is proven to mitigate risk while promoting efficiencies and collaboration.
